Sri Lankan exporters face following logistic problems in exporting to Seychelles.

- Lack of direct flights
- Long delays in transshipments
- Shipping vessels are not frequent.
- Expensive freight charges.

Though Sri Lanka and Seychelles economies are not equal in terms of absolute numbers, both economies show some resemblance on their sources of current and potential earnings such as tourism, fisheries and offshore business. The synergies therefore, can be explored in these sectors between the two nations.

# 7. MARKET ACCESS - SEYCHELLES

Goods imported are entered into the ASYCUDA World system for either:

- Home consumption
- Warehousing
- Transshipment

All goods can be classified under the Harmonized System Nomenclature which is the basis for the classification of goods by importers, exporters, shipping companies and marine insurance companies. In Seychelles it is published as Schedule 3 of the Customs Management (Tariff and Classification of Goods) Regulations 2013 and is divided into 99 Chapters. The first 6 digits of the code are common to all countries that use it and the last 2 digits are allocated by Seychelles policy makers. This code gives the rate of Trades Tax applicable.

The following taxes are collected at the point of entry on importation by Customs Division on behalf of Seychelles Revenue Commission:

- Trade Tax
- VAT
- Excise Tax

For example: cotton handkerchiefs are classified under HS Code 6213.2000 on which 25% Trades Tax applies and has a 15% VAT. The value of imported goods is based on the purchase price adjusted to a CIF level. The purchase price is an open market price where the buyer and seller are at arms length (the commercial value).

Levy is also payable at the point of entry at Customs Division. It is calculated on value or quantity. Levy is applicable on the importation of the following goods:

- Vehicles
- Chicken
- Pet bottle
- Plastic
- Canned beer
