03	Overview	Fruit Logistica introduces not only fruit and vegetable products, but the technical knowledge and skills required for effective logistics. Retail, handling of fruit and vegetables is also a key theme of the Fruit Logistica Show. The range at Fruit Logistic includes unprocessed fruit and vegetables, dried fruit, nuts, spices, biological produce, flowers and plants for self-service outlets. The branches around the fresh fruit trade get the chance with this exhibition to represent their diverse range of services across the value chain; from cultivation to the POS Short term, focused target groups and thus high efficiency are the main features of Fruit Logistica.
