SRI LANKA BREEDS AROWANA (Lucky Fish) SUCCESSFULLY IN POLONNARUWA

For the first time in Sri Lanka, it has been recorded a successful captive breeding of Asian Arowana (*Scleropages formosus*) in Polonnaruwa district recently. The species is considered as a high valued ornamental fish in the international market and the local market as well. This fish is generally called as lucky fish in Sri Lanka and famous as Dragon Fish in Chinese culture as it resemblance the Chinese Dragon, a symbol of auspicious. At present Arowana is among the top imported live fish species in to Sri Lanka to full fill the growing local demand from aquarium hobbyists.

Mr. D. M. Wimalasiri

OASIS Fish Farm (Owner)
- and -
Shine Aqua International Trading (Pvt) Ltd.
(Managing Director)

SUCCESS STORY (SRI LANKA BREEDS AROWANA LUCKY FISH)

The value of an arowana fish in the local market is vary from Rs. 5000/ to 500,000/-based on the size colour and the other body features. Therefore the commercial expansion of arowana production will be a turning point for the ornamental fish industry in Sri Lanka while it will substitute the imports

International trade of Arowana is controlled under the Convention on the International Trade in Endangered Species of Wild Flora Fauna (CITES). However CITES allows Asian Arowana

to be traded when they are bred in captivity with proven records.

Breeding of Arowana is not an easy task, it requires a lot of ground facilities like larger size earthen ponds, good brood stock and a breeder with good skill of breeding. It takes approximately 3-4 years to prepare a broodstock for breeding. Mr. D. M. Wimal Siri, the owner of the OASIS Fish Farm at Polnaruwa and the Managing Director of Shine Aqua International Trading (Pvt) Ltd has fulfilled all above requirements patiently and is the one

SUCCESS STORY (SRI LANKA BREEDS AROWANA LUCKY FISH)

who achieved this difficult task of breeding of Arowana for the first time in Sri Lanka with his long term effort and the professional fish breeding skills.

EDB has identified Mr. D. M. Wimalasiri as a professional fish breeder and a good entrepreneur during the period of that EDB implemented a project at Polonnaruwa district to increase the export supply base and the quality of fish during the period of 2008-2012. At that time he was the President of Ornamental Fish Growers Association established by the EDB in Polonnaruwa district. Having identified the potential for ornamental fish farming for export

in Polonnaruwa district, EDB with the support of other relevant government agencies had been implemented the above project in order to increase the supply base for export and the improve the quality of fish produced from Polonnaruwa. He was one of the among 225 beneficiaries under the project of which had a significant impacts of the lives of people in Polonnaruwa district where it has eventually become the supply hub of ornamental fish export in Sri Lanka at present. Mr. Wimalasiri is the top supplier of fish for export from Polonnaruwa at present and he is having number of ponds in an area of 28 acres of land. He

is having the biggest out grower network in the industry of more than 525 small scale well established suppliers have been connected with him which provides

livelihood for more than 1000 farmers in the area in addition to the 50 direct employments given by him in his 3 farms located in Polonnaruwa district.

He has been further assisted by the EDB providing a grant worth of Rs 1.5 Mn to set up a quarantine facility under the fish quality improvement project implemented

by EDB during the period of 2012-2015. With all these supports given by the government and with his own effort, he is now ready to explore the international market where EDB is continuously backing him up by giving required assistance.

Mr. Wimalasiri always admires EDB gratefully for all the support given by the organization especially the international exposure given by facilitating him to attend at Aqurama 2013 and 2015 Exhibitions in Singapore where he could win award at the international fish competition held during the Aqurama exhibition and visit Arowana breeding farms during the Farm Visit Programme organized by EDB. According to him that's how he motivated and got the idea of having his own Arowana farm in Sri Lanka.
