Solutions**

ECO FRIENDLY Packaging Solutions for Your Brand

We pursue the art of creating the best packaging solution to protect the freshness of your product.

We strive to create the best visual representation for your product and to make it visually appealing to the customer.

The products we offer use the highest grade recyclable raw materials and manufactured through an environmentally friendly process.

WHO WE ARE?

Established in year 2004, Petform has had a solid track record of catering to a variety of industries including pharmaceutical, cosmetics, bottled water, food and beverages and agrochemical.

Our business philosophy is bound to the ideals of being a value addition for our customers by creating eco-friendly, innovative and end user oriented packaging solutions with the minimal impact on the environment.

Our products as well as our processes are been accredited with the following certifications.

MR. P. MATHYTHARAN

FOUNDER & MANAGING DIRECTOR

We have started as a small preform manufacturing company and had only one injection moldu machine. Then, we realized only preforms will not help us to grow. Therefore we have started bottles & lids manufacturing as well.

Petform has reached this level because of our stakeholders. Mainly my customers and suppliers. We have a policy from the beginning that we should not break our relationship with our customers and suppliers ever.

Future, my staff has contributed much to bring Petform up to such level. There are staff members who are working with me for last 14 years. They are adding value to our products by delivering high-quality service.

An expansion project has started with a 5-year corporate plan recently. According to the plan. Petform will reach 2.6 Bn annual revenue at the year 2023/24. I'm confident that Petform will achieve that target according to the plan with the support of own dedicated stakeholders.

ABOUT Us

Petform (Pvt) Limited is a business collaboration of Srilanka and UK based investores, emerged from polymer industry, having expertise in marketing distribution, financial management, focused on manufacturing sector with the strong financial backup.

A COMPLETE PACKAGING SOLUTION

Through... Green Manufacturing

Petform is continuously investing in new technologies and researching on new raw materials that will help to reduce its carbon footprint. At present, all the products we produce are fully recyclable. Our ambition is to go a step further to identify and use raw materials that is disposed by the nature itself to produce our packaging solutions. This way, we will significantly eliminate artificial raw materials enabling us to become a fully-fledged green manufacturing company in the years to come.

WORKING IN **HARMONEY** with the Environmental

Petform believes in good environmental practice and contributes positively towards environmental sustainability. Environmental sustainability is an integral part of our business strategy and as such we are committed to reducing our carbon footprint. We have been certified as compliant with the ISO 14001 international standards for our environmental sustainability efforts.

We ensure sustainable environmental practices by;

- *Minimizing our waste and recycle as much of it as possible.*
- *Optimizing the energy and water usage in our factory, office premises, warehouses and vehicles.*
- *Using solar powered energy for the use of factories.*
- *Assessing the environmental impact of any new processes that we are going to introduce.*
- *Continuously improve our work processes related to machinery usage, noise and light pollution from our factory premises.*
