# FRESH.SAFE.HEALTHY

---

We grow the finest fresh lettuce, leaves and herbs in purpose built hydroponic greenhouses, providing premium quality healthy produce every day of the year to our customers across Southeast Asia. Our produce is grown without the need for chemical sprays, so you can be sure it is full of goodness – and nothing else.

---

# FRESH

Leaf and Vine is SL GAP accredited and we work with a BRC (globally accredited) cool chain.

We manage our produce at optimal temperature from harvest to your door, getting it to you within 24 hours of harvest means you have premium quality, with premium freshness.

Our breathable packaging keeps produce fresh for up to 7 days - great for you, great for your customers.

Farm Officer

Food Safety is our priority, and we work to ensure you, and your customers never have to doubt the safety of our produce.

Our team of international agricultural specialists have grown award winning produce for markets in the EU and UK for over 25 years, providing unrivalled expertise and competence in all aspects of production and compliance.

We work with international standards of food safety across all areas of production; from state of the art technology for water purity, to regular staff food safety training.

Farm Officer

SAFE

# HEALTHY

We want you to be confident and proud of every aspect of the produce you sell. That is why all of our products are grown for optimal health.

This means no chemical sprays, no disease, no insect damage and completely pathogen free.

The growing environment uses natural sunlight - giving the plants all the light they need for supreme health. In addition, they are fed with natural fertilisers and specific nutrients, ensuring there are no gaps in their nutritional value.

# SUSTAINABILITY

Leaf and Vine is committed to producing healthy food using systems that are good for our people, our communities and our planet.

We work in alignment with the UN Sustainable Development Goals, with our focus on those outlined below. Our vision is to be part of the solution for a food secure future.

This means we support reforestation initiatives to protect ecosystems and actively promote sustainable agriculture through school education programmes. We are committed to social uplift in the communities where we work, and those we supply.

**We are committed to ensuring you can be proud of every aspect of our produce you have on your shelves.**

# TRACEABILITY

---

Knowing where your produce comes from is essential for consumer confidence and supply chain transparency. We manage our production with state of the art computer systems, to ensure we can trace each lettuce back to its greenhouse and growing section.

This means you can be confident that we know exactly what your produce has received – and we will never provide you with anything other than premium quality.
