## Sell-fish with selfless service

Rainbow aquarium commenced the business in 2007 to be committed to supply the quality local and import marine live fish and invertebrates and fresh water live fish to our worthy customers worldwide. Since Our diving experience spanning for more than 30 years in Sri Lanka, we are experts in this field. We have two well trained diving teams who are committed to meet our customers' requirements in every minute and we have also an effective supply network around the country with more than 30 supply outlets. We are concerning always about quality fish.

Our motto says **"We serve the world live fish with quality"** which describes our vision. We guarantee 100% that all our marine live fish and invertebrates are hand-collected.

These hand-collected marine live fish and invertebrates are quarantined and stocked in a well equipped aquarium system with the skimmer and filters which are maintained assuring high quality standards to meet the international quarantine specifications.

Our main product mix is marine live fish, invertebrates Brackish water fish and fresh water live fish. In addition to this varieties we are now importing Red sea and Maldives tropical fish it includes the fresh water fish and plants.

We cordially invite you to negotiate with us to build up a long term business relationship for the benefit of both parties.
