

# KORALAGE FIBRE EXPORTERS

Manufactures & Exporters of Quality Coir Products

**SRI LANKAN COIR**

## WHO WE ARE

Koralage Fibre Exporters (KFE) is one of Sri Lanka's leading manufacturers and exporters in the production of coconut related products. Since 1995, our products have been exported internationally to the USA, Canada, Japan, Netherlands and South Korea.

Our business currently operates under the leadership and management of Mr Piyadasa Korale. Mr Korale is the founder of the business and has over 45 years of experience in the coir industry.

Our two large manufacturing plants located in the heart of Sri Lanka's Coconut Triangle, is a prime location where an abundance of coconuts are grown. KFE's main plant operates in Marawila, the north western province, where the highest Quality coir products are produced. The second plant located in Kurunegala, is where we source our own finest raw materials that enables us to manufacture these products.

The secret to our success comes from building quality relationships and trust with our customers. Moreover, our passion is to deliver and supply high quality coir products that meet our customer's needs. Lastly, as a company that has become one of the largest manufacturers and exporters in the trade of coconut products, we continuously strive to maintain and improve the quality of our products.

## BENEFITS OF USING OUR PRODUCTS

We believe strongly in sustainability and all products are 100% natural, biodegradable and environmentally friendly.

We are committed to efficiency and by having two factories this enables us to maximise production and to deliver the highest quality to our clients punctually.

Since we are the sole dealers and distributors of our products, this allows us to offer the lowest prices available, by eliminating other competitors, as we can supply our products directly from the manufacturing plant to the customer.

Our own fibre mills have allowed us to maintain and control the quality of our goods. This is seen through all stages of production, where we aim to produce the finest quality to satisfy our client's needs.

Our committed and well experienced employees have been trained to ensure that the products are up to maximum satisfaction for all our international clients.

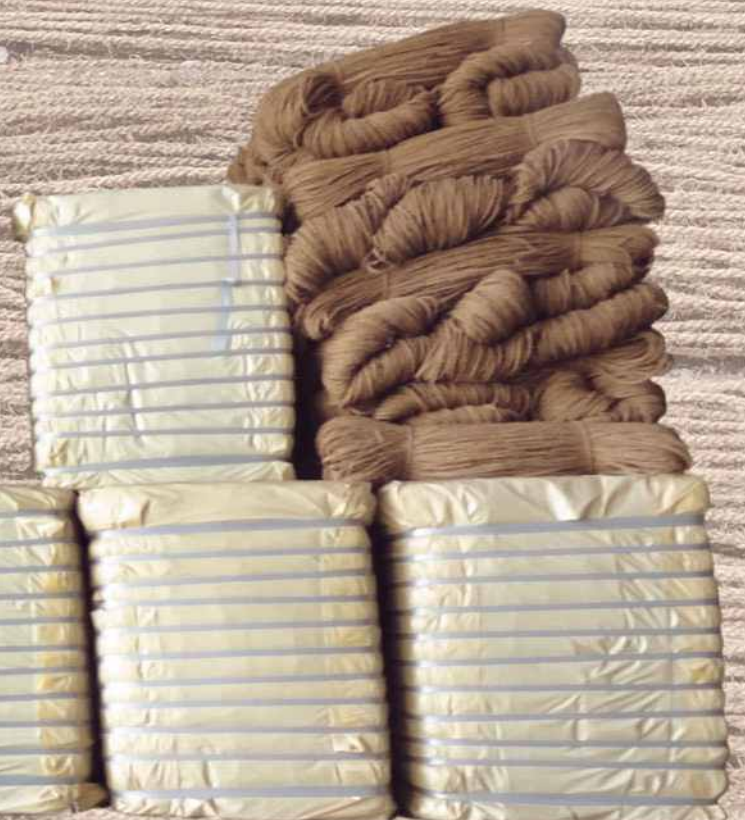

# HOP TWINE

# HOP TWINE

These twines are machine twisted and made out of natural bristle coir fibre and contains inner cotton threads. This is an environmental friendly solution for hop cultivation in the Beer industry, as they are biodegradable making it easier to decompose.

		<b>2 Ply</b>		<b>3 Ply</b>

<b>Quantities</b>	(100 or 200 strings/bundles) 2800 strings/bale 150 bales/40 Ft HC Container	2600 strings/bale (100 or 200 strings/bundles) 150 bales/40 Ft HC Container	2400 strings/bale (100 or 200 strings/bundles) 150 bales/40 Ft HC Container	2400 strings/bale (100 or 200 strings/bundles as per required) 150 bales/40 Ft HC Container
<b>Packing</b>	Bales are hydraulically pressed and wrapped in polycloth			

# AQUA TWINE

## **AQUA TWINE / MARINE TWINE**

Aqua twines are used for oyster / sea squirt / Mongi cultivation and it provides a necessary environment that enables breeding to grow. The twine is made out of a natural brown coconut fibre, which contains inner Polypropylene thread. The twines also have 90% of its hair/baby hair been removed to help create a natural breeding environment and the number of baby oysters that can hang along per inch of twine will increase dramatically due to the smoothness of the hair removed twine. There are two categories of aqua twines available.

# ROLL TYPE

**Specifications of roll products are mentioned below**

- Roll Length - 1600m
- Twine Diameter - 5 - 6 mm
- Roll Weight - 18.75 Kgs
- Twist per foot - 34 - 38
- Quantities - 960 rolls ( 18 M/Ton ) can be loaded to a 40 ft HC Container

# MARINE TWINE NETS

Net products are made out of aqua twines, which are interwoven with two lines of polypropylene ropes and the specifications of the net are mentioned below

Twine Diameter	- 5 - 6 mm
Length	- 160 cm
Width	- 90 cm
Weight	- 2.343 Kgs / Net
Twine length per net	- 200 m
Quantities	- 5120 nets ( 12 M/ Tons ) can be loaded to a 40ft HC container
