

SINCE 2012

COMPANY PROFILE

OUR VISION

To provide an outstanding service and support facilities to our customers so that they can remain competitive and become leaders in their respective industries.

ABOUT ADVENTA

Adventa is a Digital Product and IT Consultancy Firm that takes pride in digitally transforming businesses to face the modern day challenges. Located in Colombo, Sri Lanka, Adventa is fueling the digital revolution by coming up with futuristic digital products and services. For the last 7 years, we have been helping out clients to exploit the best IT solutions to improve efficiency, reduce costs and increase overall productivity; ultimately supporting to achieve their business goals. Adventa strives to help many businesses leapfrog into technology, delivering business value and expected Return on Investment (ROI).

WHY ADVENTA ?

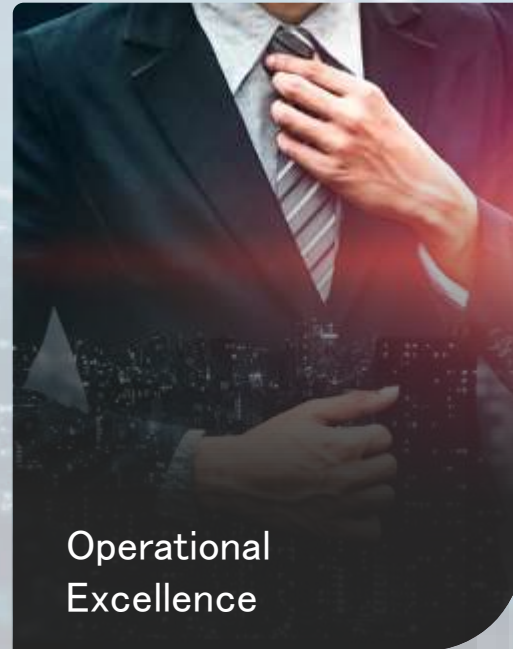

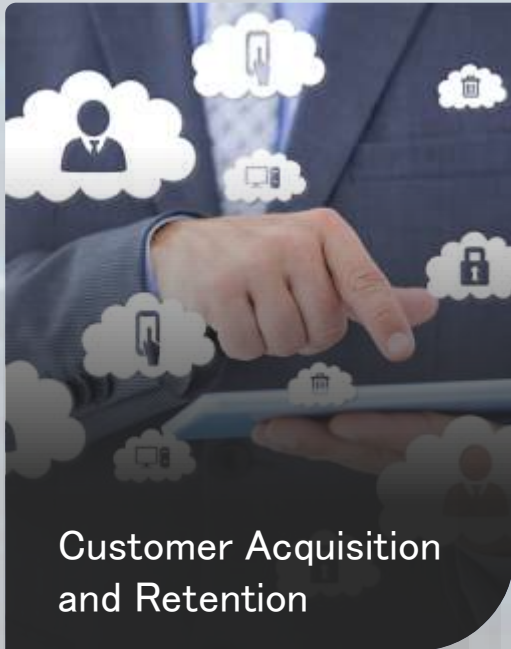

Over the years, the Adventa's a team comprising of IT professionals + industry veterans has helped many companies throughout their journey of Digital Transformation. We mainly focus on Digital Foundation, Customer Acquisition & Retention, Customer Service and Operational Efficiency through our IT solutions.

WHAT IS DIGITAL TRANSFORMATION ?

Digital Transformation is the integration of digital technology into all areas of a company to transform how they operate & create value for their customers. However, the very idea of digital transformation may differ from company to company based on the nature of the operations. Therefore, the most important thing is that we identify what the requirements of your company are and implement the most suitable solutions according to the guidelines and approaches suggested by the International Telecommunication Union.

KEY AREAS – DIGITAL TRANSFORMATION

A human hand on the left and a blue, futuristic robotic hand on the right are positioned as if reaching towards each other. The background is dark with a shower of small, light-colored particles falling from the top right. The text "OUR PLATFORMS" is centered in white, bold, sans-serif font.

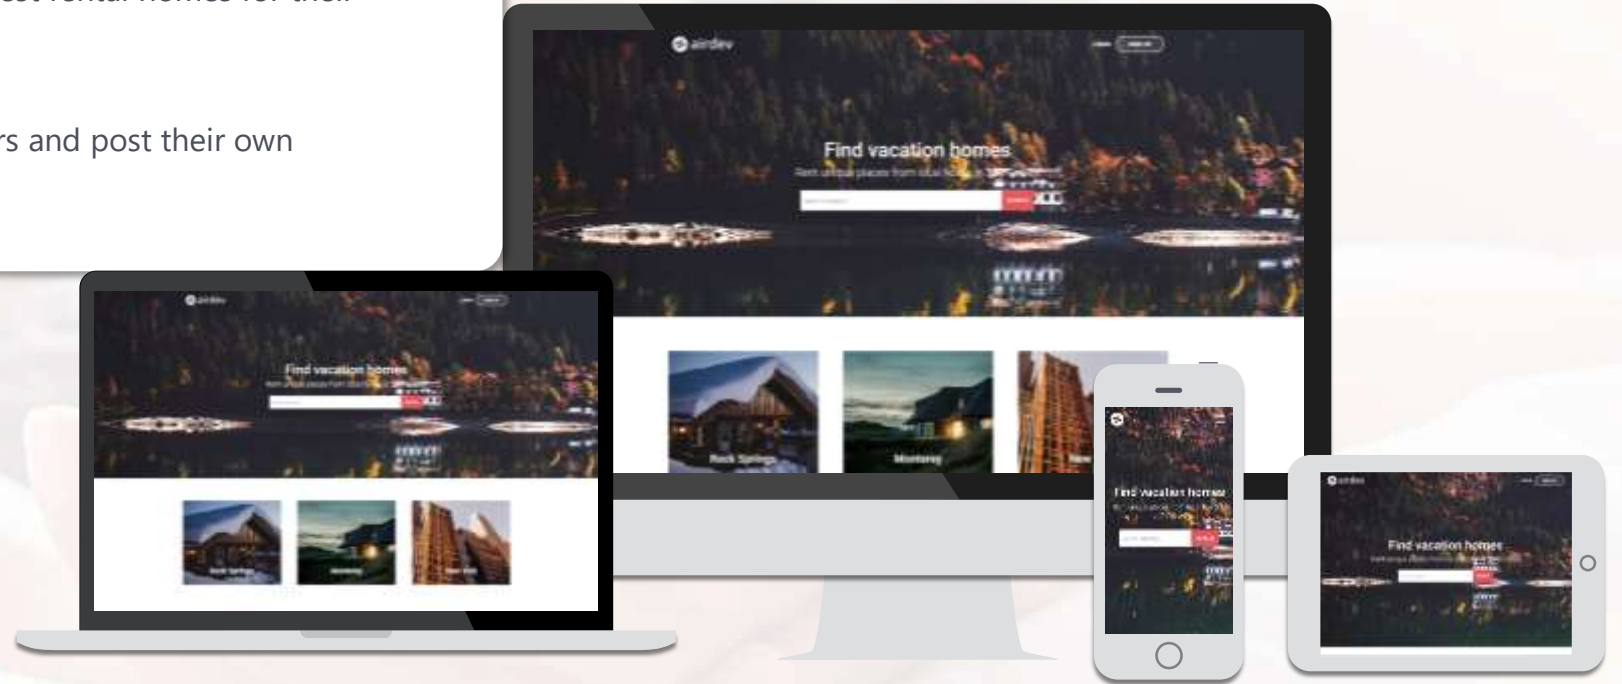

OUR PLATFORMS

A romantic scene of a couple holding hands on a balcony. The woman is in the foreground, her hands clasped with the man's hands behind her. They are both looking towards the camera. The background shows a balcony railing and lush greenery. A semi-transparent red diamond is centered over the image, containing the text 'AirDev Find Vacation Homes' in white.

Lincoln University SRM

A Student Relationship Management System

The Corona Virus (SARS-CoV-2) or Covid 19 is a highly contagious virus which can cause severe acute respiratory distress and a generalised vasculitis type picture. Covid19 was first identified in Wuhan, China in December 2019 and has spread globally causing a pandemic.

What is Remotim?

The platform will create a deep learning model for the automated detection and classification of COVID-19 on chest x-ray / CT scan, and to assess disease severity in patients by quantifying lung involvement. Since access to X-rays / CT is widely available all over the world, this will make life easier for frontline staff. This will help isolate patients instantly and recommend a Polymerase Chain Reaction (PCR) test for confirmation of the diagnosis.

In some studies, it has been found that the first symptoms of chest viral pneumonia can be detected using AI even before the patient has other symptoms related to Covid-19.

This platform is offered as 'Medical Scanning as a Service (MaaS)' for healthcare professionals and hospitals.
