

We deal with Fresh Tea from Estates

We personally visit the tea estates and factories in different regions and select the best teas, which we buy privately from the estates. The quality of the tea is strictly controlled by

1. Getting the best seasonal tea of the year.
2. Packing the teas immediately, unblended.
3. Supplying them in a minimum period of time.

About us

Michiko & Pani Company was established in 1996 as an approved company by the Ceylon Tea Board.

Our company is situated in the Central province of Sri

Lanka which has easy access to the tea estates in the hill country. We own eight hectares of land where we grow spices for export purpose.

Since we started exporting packed tea to Tokyo, Japan in 1996, we have kept our policy of dealing with quality tea only. By supplying unblended fresh tea we have gained a good reputation among tea specialists around the world. Now we have expanded our market to London, Wales in the UK, USA and Australia.
