

Aqua Ally is a farmer and exporter of freshwater live fish in Sri Lanka which was formed by 03 brothers-by-heart, in the year 2017 with Innovative, Leading, Eco-Friendly Young business concepts and ethics.

Binding to the core business of Breeding and Exporting Freshwater Aquarium Fish, currently Aqua Ally is maintaining more than 10,000SqFt of mud ponds as we love Eco-Friendly Natural Farming where we could harvest Naturally Grown, Colorful and Healthy Fishes. We have eliminated intermediaries in our supply chains by managing our own mud ponds and also, we have developed an exclusive farmer group for Aqua Ally through energetic young women from lower income families in villages. We support them to enrich their living style by giving them a great opportunity to earn extra income through fish farming while providing technical knowledge.

All mud ponds are in the up-country side where natural purist water is received throughout the year with absolutely no acidity and Salivity in the water and is naturally rich in minerals. Ponds are receiving bountiful sunlight, keeping the water temperature within the required range to enhance the growth of healthy fishes improving its' colors. Our team carefully looks after the growth of fishes and harvest at the correct stage to quarantine to ready to export the fishes.

Our freshwater fish quarantine center is also located in the farming facility, separately, which is facilitated to quarantine approximately 25,000 fishes at once. In the quarantine center we separately maintain stock, selection, nursing, quarantine tanks and controlled export packing room. As a Quality Assurance Policy, we always consider, testing and maintaining water quality for safe and non-hazards levels of Water Chemistry including good level of pH, Ammonia, Nitrate, Alkalinity, Phosphate ect. and we do timely lab testing through government competent authorities. Also, we take extra care in final packing to create a comfortable environment for fishes to enjoy their long journey to reach destinations stressless and in good health. Strengthening quality control procedures have led us to supply quality fishes to the export market continuously.

As a young business, we always assure our capability of supplying quality fishes on time, continuous supplying ability, transparency in business transactions, flexibility of our terms, prompt responsiveness and competitiveness in pricing.

Our utmost goal is to satisfy pet fish lovers by supplying colorful healthy fishes. We love to invite you all to join us to deliver the best quality fishes to the world!
