- * *Contactors & MCBs*
- * *Industrial Plugs & Sockets*
- * *Variable Speed Drives*
- * *Level Measurement Sensor*

- * *Safety Sensor*
- * *Image Processing Camera*
- * *Sensors (Proximity/ Temperature/ Pressure/ Humidity/ Photoelectric)*
- * *Controllers, Counters, Timers, PFR, Energy Meters*
- * *Gear, Servo, Stepper Motors & Drives*
- * *Signal Light*

Services

* *Machine & Factory Automation*

* *Industrial panel boards*

* *Process Monitoring & Control Systems (VFD Base)*

* *Energy saving solution*

* *Energy monitoring system*

* *Knowledge sharing & Training programs*

Management & Ownership

"When it comes to building a business, I believe that customer relationships, quality of products, and uninterrupted customer support are the most important factors to consider. Most firms are crumbling in the face of a competitive environment owing to a lack of ties with their consumers. Hence, we deeply understand the exact requirements of customers through strong relationships and cater to them with our finest solutions. Eventually, we expect to delight customers as well as the other stakeholders in our organization. "

Chamila Prabath Guruge
Chief Executive Officer
Everbolt Group of Companies

The Journey So Far

01

We started in 2010 as a small company supplying industrial automation products.

02

In 2015, we've moved to a new location and come up with a new face for business.

03

In 2016, we changed our name to Everbolt Engineering (PVT) Ltd, and it was a great milestone in our business journey.

05

2020 was becoming a challenging year for our company. But despite the external challenges, we've expanded our business overseas by establishing Everbolt International (Pvt) Ltd. That was one of the great milestones in our business history.

04

In 2018, we expanded our business into the service sector by establishing our new sister companies as Everbolt Engineering Services (PVT) Ltd and JIP Technology (PVT) Ltd

06

In 2022, Everbolt Engineering (PVT) Ltd, achieved a significant milestone by obtaining the ISO 9001:2015 certification.

Our Subsidiary Companies

Everbolt Engineering Services (Pvt) Ltd is a company that strives to push the boundaries of technology by providing a range of solutions for industrial power distribution, control boards, PLC-based control systems, machine and factory automation, remote monitoring and control systems, energy management systems, industrial wiring, installation, and commissioning of power transformers and capacitor banks. Their goal is to increase productivity and sustainability in Sri Lankan industries by optimizing technology know-how.

JIP Technology Private Limited has been involved in the power energy management business for several years. In 2012, expanded the services to include electrical designing, consulting, Building Management System, Home automation and execution domain business. Through the success, JIP expanded business into India, Sri Lanka, and Myanmar by 2018. Today, JIP Technology is one of the leading Power Energy Management Solution Providers in Sri Lanka, offering innovative solutions to help clients optimize their energy usage and increase efficiency.
