Company Profile

JOIN HANDS TO GO BEYOND!

Who We Are

X-Venture is a tech company providing diverse **digital transformation** services.

Primary Focus

- To capitalize on our flagship product, **XAPI**: an API design tool and other **bespoke solutions/services**.

Key Objective

- Be a **future-proof technology** provider that enables **faster GTM** with an **impactful ROI**.

Xventure

Our Core Values

Customer-Driven

We ensure to understand our customer expectations and deliver them through the latest technology.

Quality First

We assist in building a sustainable and resilient business model to stand the test-of-time.

Iterative Outcomes

We guide our customers in their digital transformation initiatives every step of the way.

Innovation-Led

We foster versatility and adaptability to encourage faster GTM.

People-Centric

We promote principles to work as one team to empower and build skill sets within an enterprise.

Initiated service-arm
functions

First-Year Anniversary

Celebrated the 1st year company
anniversary with 10+ employees

Second-Year Anniversary

Celebrated the 2nd year company
anniversary with 50+ employees

Xventure

Our Observations in the Tech Industry

PROVIDER SCARCITY: Inadequacy of qualified digital transformation service providers

EXPERTISE VOID: Lack of high-competent, offshore technical experts with software craftsmanship

PROLONGED ONBOARDING: Recruitment and onboarding lead time

OBSOLETE OBSTRUCTION: Outdated systems and processes slowing down customer centric journeys

Our Service Offerings to Fill Gaps

DIGITAL TRANSFORMATION

We empower businesses with agile digital transformation at scale to deliver unique performance and customer delight. With our expertise we ensure building an agile, secure, constant, and sustainable digital foundation for our clients.

OFFSHORE PRODUCT DELIVERY TEAM AND RESOURCE AUGMENTATION

Our dedicated offshore tech army work around the clock to offer a matchless customer experience to our clients. We possess a set of skilled IT experts who would cater to the emerging demands of resource augmentation by handling the projects with utmost care.

ARCHITECTURE CONSULTING

Having years of real-world, hands-on experience in integrated consulting services, our experts design robust, top-quality, secure solutions while supporting the full process life-cycle.
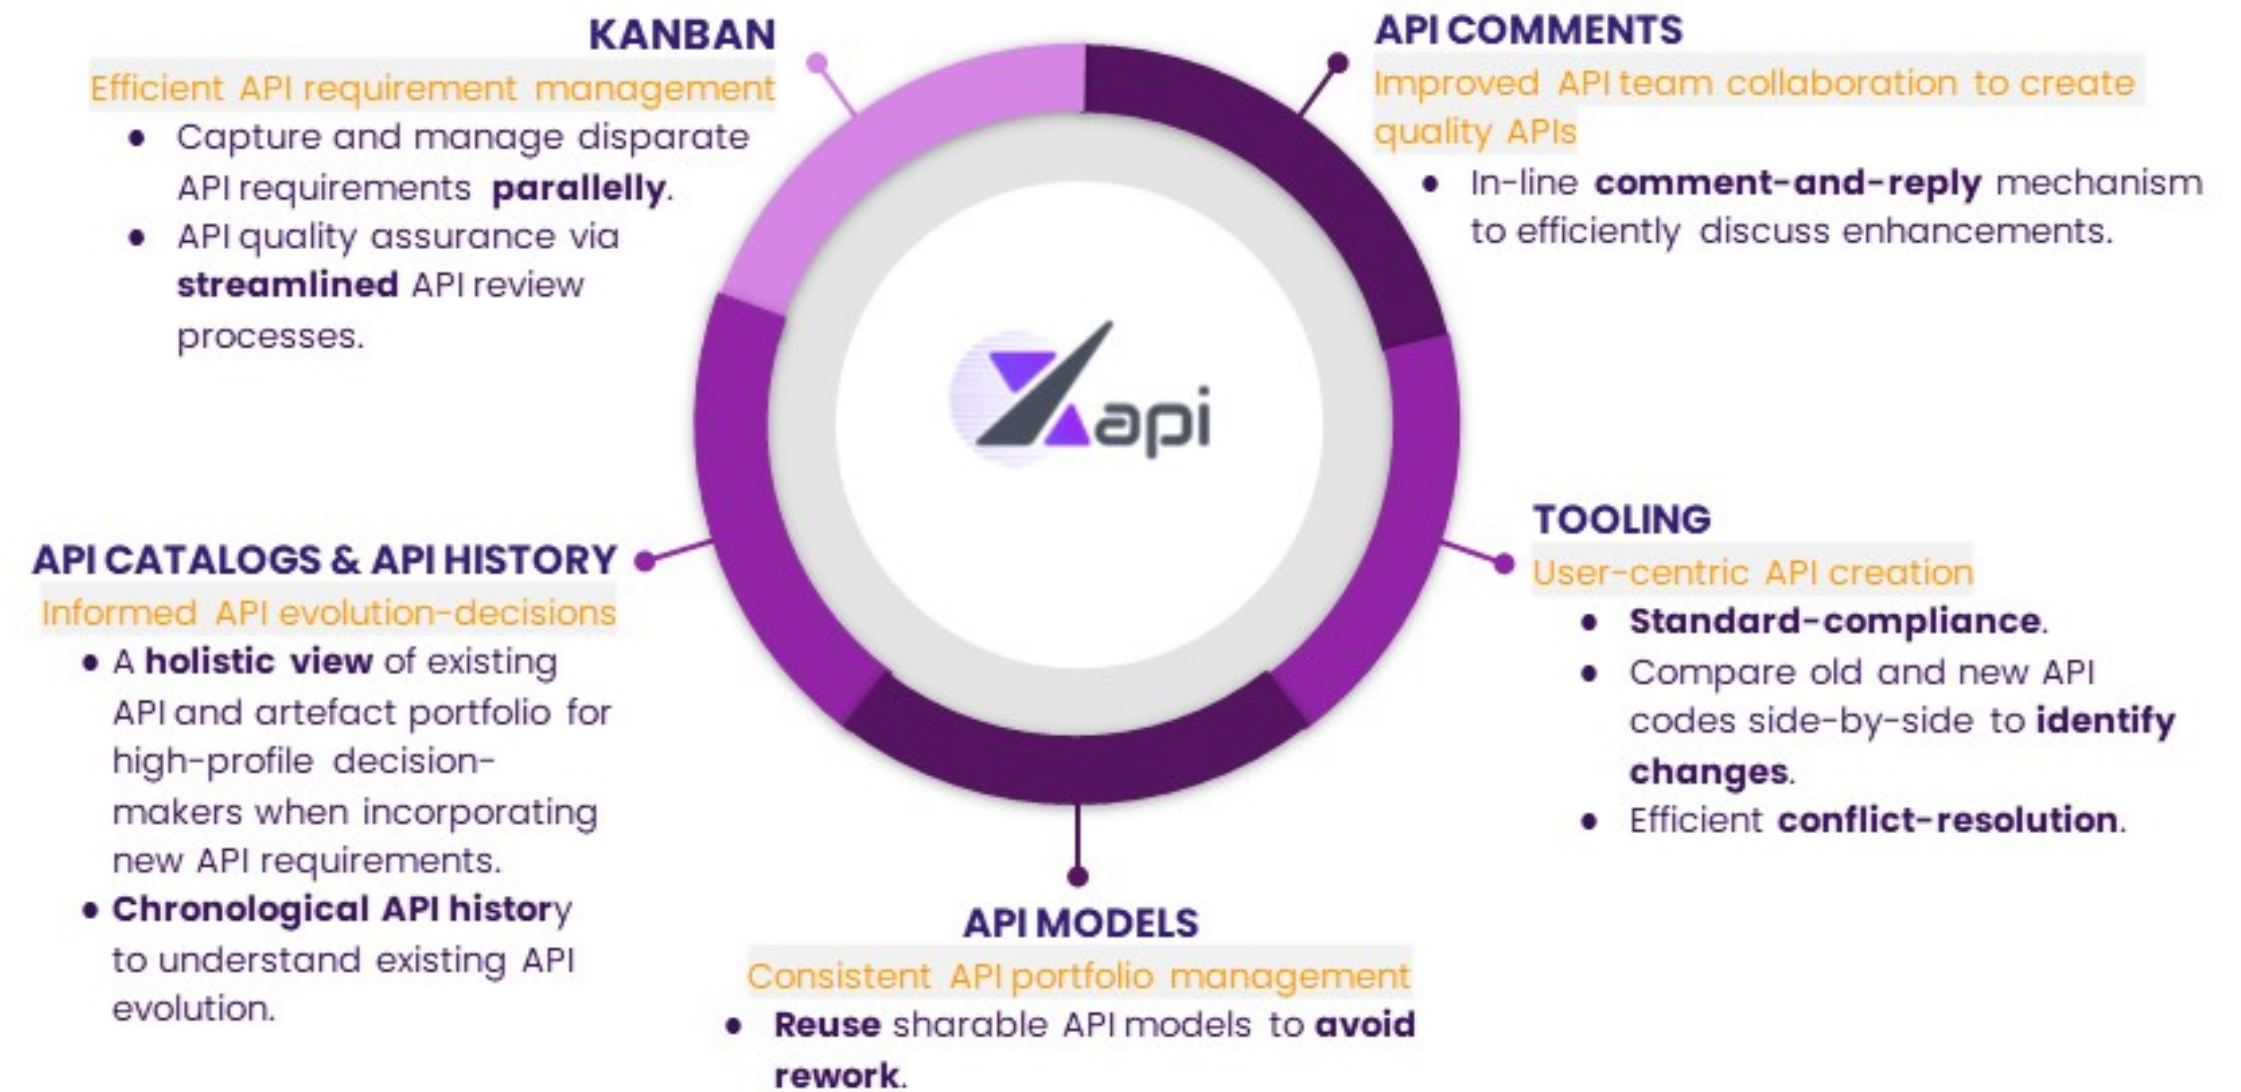

LEGACY SYSTEM MODERNIZATION

We aid enterprises to step out from the legacy business processes and experience modernized architecture that helps them to achieve new heights in their businesses. These modernizations help enterprises to reduce trade disruptions.

venture

Our flagship product!

A fully-fledged, standard-compliant, user-centric API design tool for API design teams.
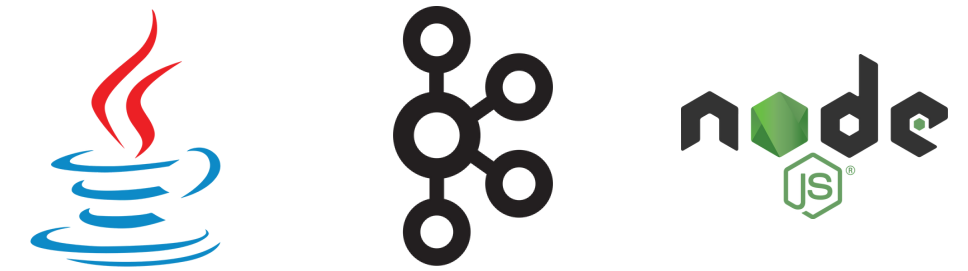

For APIs and beyond!

KANBAN
Efficient API requirement management
- Capture and manage disparate API requirements **parallelly**.
- API quality assurance via **streamlined** API review processes.

API COMMENTS
Improved API team collaboration to create quality APIs
- In-line **comment-and-reply** mechanism to efficiently discuss enhancements.

API CATALOGS & API HISTORY
Informed API evolution-decisions
- A **holistic view** of existing API and artefact portfolio for high-profile decision-makers when incorporating new API requirements.
- **Chronological API history** to understand existing API evolution.

TOOLING
User-centric API creation
- **Standard-compliance**.
- Compare old and new API codes side-by-side to **identify changes**.
- Efficient **conflict-resolution**.

API MODELS
Consistent API portfolio management
- **Reuse** sharable API models to **avoid rework**.

Our Expert Ensemble

At X-Venture, we have a set of experienced, diversified, and innovative experts, who are capable of supporting all time-zones to deliver the best for our clients.
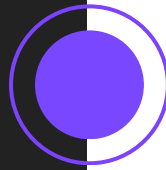

OUR CULTURE

- Promotes the **freedom** to solve problems and grants the **opportunity** to work together as a team without following a hierarchy.

- Provides the space to share the ideas and thoughts of the individuals, encouraging **open communication and transparency.**

HOW WE WORK

- Follow **Agile methodologies** and use Scrum or Lean Kanban, when necessary.

- Work with **cutting-edge technologies** in an environment that motivates us to be our best.

- Support both **test-driven-development** and **behavior-driven development**.

Venture

Recipe of Our Success
