OUR MISSION

Our mission is to connect exceptional talent with businesses needing specialized software engineering, empowering clients with the resources to achieve their goals and drive project success.

Dev Solutions

From custom software development to mobile app development and web design, our development services are built to drive efficiency, scalability, and innovation. We combine technical expertise with a deep understanding of business needs to create solutions that are reliable, secure, and tailored to your goals.

Custom Software Development

Develop customized, high performance software solutions precisely tailored to meet your unique business needs.

Mobile app development

Robust and user-friendly mobile applications for iOS, Android, and cross-platform environments.

Web application development

Build scalable, responsive, and high-performance web applications tailored to your business needs.

Cloud Solutions

Our Cloud Solutions harness the power of AI, machine learning, and cloud technologies to enhance performance, automation, and decision-making. We focus on building smart, secure, and future-ready systems that improve efficiency, ensure reliability, and drive innovation across your business operations.

Cloud-Based Solutions

Empower your business with secure, scalable, and efficient cloud solutions that optimize collaboration and operational flexibility.

AI and Machine Learning Integration

Enhance your systems with intelligent automation, data insights, and predictive capabilities powered by AI and ML.

Quality Assurance and Testing

Ensure your software's reliability and performance through comprehensive testing and continuous improvement.

The Leadership

Our leadership team brings together decades of experience, technical excellence, and strategic vision. Guided by innovation and integrity, they drive the company's mission to deliver world-class software solutions and foster lasting partnerships with clients around the globe.

SAHAN GANEPOLA

Director & CEO

With 17 years of experience across IT, hospitality, and telecom, Sahan blends technical expertise with strategic insight to drive innovation.

DILANKE KUMARA

Director & COO

With over 12 years of experience in software engineering and leadership, Dilanke has led successful projects across diverse global industries.

The Team

At FACTn Software, our strength lies in our people. We are a team of passionate and skilled software engineers, project managers, and tech innovators dedicated to delivering excellence. With a strong focus on collaboration, creativity, and continuous learning, our team ensures every project meets the highest standards of quality and performance.

Portfolio

Each project is a reflection of our passion for design, technology, and meaningful user experiences. From startups to established brands, we collaborate closely with clients to build digital solutions that are functional, engaging, and crafted with purpose.

10+

projects successfully completed across diverse industries.

20

years of experience in design and development.

5+

global clients collaborating from around the world.

Sensio

PROJECT OUTLINE

Developed Sensio's intelligent care technology system — a leading AI-driven solution for fall prevention and silent nurse calls. Our work helped transform sensor data into actionable insights, empowering healthcare professionals to deliver more efficient, person-centered care. The system combines advanced sensors, seamless connectivity, and intuitive design to enhance safety, improve response times, and support better outcomes across healthcare facilities.

Laudi

PROJECT OUTLINE

We collaborated with Laudi to bring their vision for smarter sports management to life. Our team developed intuitive digital platforms like Club Arena and The Coach, designed to streamline training, match planning, and facility coordination. Through clean design and seamless functionality, we helped Laudi empower clubs and coaches to stay organized, save time, and focus on what truly matters — the game.

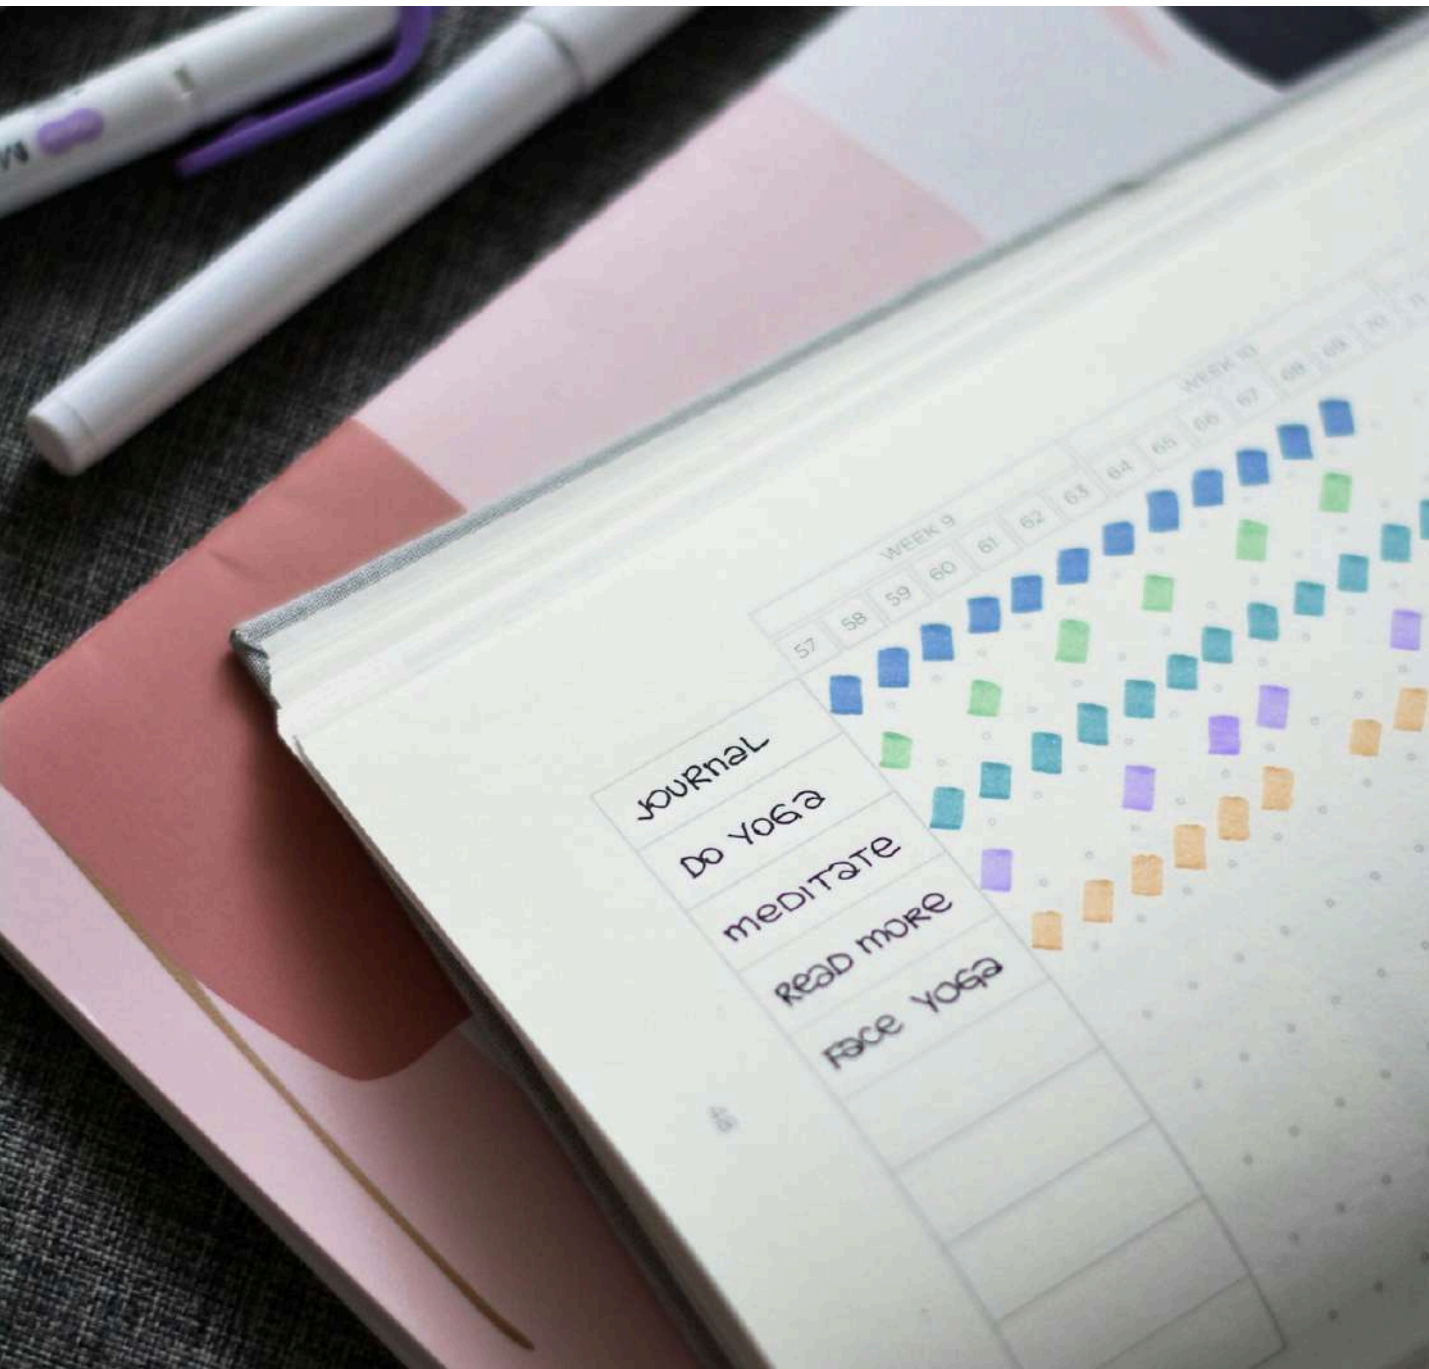

MyDrive

PROJECT OUTLINE

We designed & developed MyDrive, a Sri Lanka-based platform designed to make vehicle assistance fast and hassle-free. Our solution connects drivers with trusted service providers for towing, roadside help, and garage repairs — all through a seamless digital experience. With a focus on reliability, convenience, and real-time support, MyDrive helps drivers get back on the road with confidence.

Endely

PROJECT OUTLINE

Developed Endely, an inclusive habit-building platform designed to help users create lasting positive routines. Our work focused on crafting an intuitive, data-driven system that empowers individuals to track their actions, stay consistent, and reach personal goals with ease. By combining smart reminders, seamless progress tracking, and a supportive community experience, Endely inspires users to stay motivated and grow — together.

Our Partners

At FACTn Software, we believe that great partnerships are the foundation of technological progress. Our trusted partners share our commitment to quality, creativity, and innovation — helping us deliver advanced digital solutions that empower businesses worldwide.

Base in Norway

A software-development partner specializing in custom IT solutions for businesses in Scandinavia and beyond.

Base in United Kingdom

A UK-based software development company dedicated to empowering businesses.

Base in Australia

Reliable, Local Tech Support built for any type of businesses.

Tech Stack

Our work is powered by a modern tech stack designed for performance, scalability, and seamless user experiences. From front-end design to back-end development, we use the best tools to build fast, reliable, and visually engaging digital products.

Front-End Development

Crafting seamless, interactive interfaces for engaging digital experiences.

- + React
- + Vue
- + Angular
- + Tailwind
- + Bootstrap
- + Wordpress

Back-End Development

Building powerful, secure systems that drive flawless performance.

- + C#
- + JAVA
- + Python
- + Go
- + PHP
- + Ruby
- + Node
- + SQL Server
- + NOSQL

UI/UX Designing

Creating purposeful, visually striking designs that connect and inspire.

- + Figma
- + Adobe suite

Let's Get to Work Together
