## Introduction

Sage Systems (Private) Limited was established in 2017. Our mission revolves around developing cutting-edge business solutions tailored for organizations seeking to optimize their processes and achieve their objectives.

Leveraging modern, state-of-the-art technology, Sage Systems is dedicated to enhancing the productivity, transactions, and day-to-day management activities of our client organizations. Through the utilization of advanced cloud technologies and innovative design methods, we ensure seamless and timely access to organizational data from any corner of the globe through secured Information security gateways.

Headquartered in Sri Lanka, a rapidly growing country in Asia, we have embraced the opportunity to not only tap into the international market but also to deliver the latest Information and Communication Technology - ICT solutions to emerging organizations within Sri Lanka. Our commitment lies in offering top-notch solutions to clients, emphasizing easy usability, an unparalleled user experience, and the highest quality standards.

At Sage Systems, we firmly believe in delivering the best ICT solutions at competitive prices. Our dedication to quality is unwavering, and we never compromise on the services provided to our customers. We hold the belief that a satisfied customer leads to accelerated business growth, and that remains our primary motivation.

## Vision

To be the leader in providing IT solution to partners worldwide by enhancing their organizations value.

## Mission

- To play a main part in bringing a “Paperless Environment” in organizations, which brings up our organization's motive “Think Green, Go Green with Greener Technologies”
- To connect organizations at different levels together, which will make a one-connected place for everyone.
- To fulfill social responsibilities with the idea of making the world a better place.
- Shape a bright future for society and employees, which will contribute to the country's development.
- To achieve maximum customer satisfaction over the entire life cycle of our customer solution via our excellent products and solutions.

## Core Values

- **Innovation**
  - Innovate and craft advanced solutions tailored to the customer's needs, fostering enduring benefits for their organization in the long run.
- **Quality**
  - Consistently elevate the quality of our work and services, ensuring an ongoing enhancement for our valued customers.
- **Customer Satisfaction**
  - Provide services that exceed our customers' expectations, delivering results that go above and beyond.
- **Great Environment**
  - Cultivate an exceptional working environment that fosters the well-being and success of every individual within the organization.
- **Transparency**
  - We uphold a culture of absolute transparency in our work environment, founded on the mutual trust between our customers and us.

## Technology Applied

We firmly believe that providing our customers with cutting-edge technological solutions and services not only benefits them but also positions us for long-term success. The rapidly evolving nature of the Information Technology industry demands constant innovation and adaptation. By staying ahead of the curve and anticipating future trends, we ensure that we are not just reacting to changes, but proactively shaping the future of technology.

At Sage Systems, this commitment to foresight and innovation drives everything we do. Our team of experts continuously analyzes market trends and customer needs to develop solutions that are not only relevant today but also resilient for the challenges of tomorrow.

By leveraging our deep industry knowledge and cutting-edge tools, we empower our clients to navigate the complexities of digital transformation with confidence. Whether it's optimizing operations, enhancing cybersecurity, or driving digital innovation, we ensure that our solutions are tailored to meet the unique demands of each client.

Technologies we use,

## Modules

At Sage Systems, we are dedicated to delivering a comprehensive suite of services that add real value and elevate our clients' experience. While our expertise spans across many industries and technologies, the key specialties highlighted below represent the areas we have successfully delivered in – and continue to work on today. However, our capabilities are not limited to these alone; we constantly expand and adapt to meet new challenges and opportunities.

### 1. Sage Financials

- To efficiently manage and streamline the processing of accounts and financial data for an organization, ensuring accuracy, compliance, and effective financial oversight.

### 2. Sage Management

- To effectively oversee the daily operations of an organization, it is essential to enhance the management process.

### 3. Sage Production

- Effectively oversee and coordinate the production processes within an organization.

### 4. Sage HR

- Effectively oversee and administer organization personnel and their associated information within an organizational framework.

### 5. Sage Stock Management

- To manage finished products that are been manufactured by an organization.

### 6. Sage Payroll

- Efficiently oversee organizational payroll processes to ensure accurate compensation distribution.

### 7. Sage Invoicing

- Tracks transactions, generates invoices, and manages payments, ensuring accurate and organized financial records for businesses.

### 8. Sage ISCPM

- Integrated Shipyard Commercial and Production Management Systems has four core systems with Dashboards that automate estimating, billing, costing, scheduling, and resource allocation, improving coordination, real-time tracking, and productivity in shipyard operations.

### 9. SAGE ISSBM

- The Integrated Ship Building Management System streamlines design, planning, and construction through automated workflows and real-time dashboards. It enhances coordination, material management, and productivity across the entire shipbuilding process.

## Modules (Cont.)

### 11. SAGE ISEMMS

- The Equipment Management and Maintenance System optimizes asset tracking, maintenance scheduling, and performance monitoring through automated processes and real-time dashboards. It enhances equipment reliability, reduces downtime, and ensures efficient resource utilization across operations.

We **specialize in building tailored systems** designed to support and elevate unique industries and their specific needs. **Rather than offering an off-the-shelf solution, we provide customized systems crafted to meet the distinct requirements of each organization.**

**And most importantly, all these modules come with unlimited licenses at no additional cost.**

## OUR GLOBAL REACH

## How it operates?

Our range of technological solutions are accessible to organizations across the country, around the world. This includes not only high-level corporations but also emerging businesses in Sri Lanka and globally, empowering them to realize their goals. To illustrate,

- Government Organizations/ Institutes
- Education Institutes
- Factories
- Medical Sector
- Private Sector Organizations
- Shipyard Industries
- Manufacturing Sector
- Heavy Engineering Sector

We are dedicated to delivering optimal solutions to our customers in a highly cost-effective manner. We empower our customers by allowing them to choose their preferred payment method and timeframe for our services. Our commitment to affordability ensures that high-cost payments are unnecessary for implementing these solutions. This enables our customers to effortlessly acquire and implement solutions within their organizations, resulting in an unparalleled user experience.

## Data Security and Redundancy

At SAGE Systems, our cybersecurity experts offer comprehensive guidance to help organizations establish strong defenses against global threats like viruses, malware, and ransomware. We specialize in advanced security solutions, including Endpoint Protection Systems (EPS) and firewall technologies. EPS utilizes cutting-edge behavioral analytics and synchronized security, detecting and isolating threats quickly while ensuring optimal device performance. Our sophisticated firewalls provide unparalleled visibility into network activity, enabling instant responses to incidents, managing web and application access, and uncovering hidden risks. Together, these solutions empower organizations to maintain a secure, resilient IT infrastructure that proactively safeguards against evolving cyber threats.

## Microsoft Partnership

As a trusted Microsoft Partner, we are proud to offer our clients access to a comprehensive portfolio of Microsoft products and services, backed by our deep technical expertise and commitment to innovation. This partnership not only reflects our alignment with Microsoft's global standards but also empowers us to deliver tailored solutions with enhanced value, flexibility, and support.

Through this collaboration, we are able to provide competitive pricing on a wide range of Microsoft offerings, including Microsoft 365, Azure cloud services, and one of our key strengths—Microsoft Dynamics. Whether you're looking to streamline operations, improve customer engagement, or enable smarter decision-making, Microsoft Dynamics offers powerful ERP and CRM capabilities designed to scale with your business.

Our certified professionals work closely with clients to understand their unique requirements and implement Microsoft solutions that drive efficiency, productivity, and growth. From initial consultation and deployment to training and ongoing support, we ensure a smooth and impactful digital transformation journey.

Being a Microsoft Partner also gives us early access to new technologies, continuous training, and dedicated support—benefits we pass on to our clients. This means faster implementation times, more customized solutions, and a partner you can trust to keep your business ahead of the curve in today's dynamic market.

## Finacle Support - Banking Sector

Finacle is a leading core banking software platform trusted by financial institutions for secure and efficient operations. It supports retail, corporate, and digital banking functions such as account management, lending, payments, and regulatory compliance. With a scalable, flexible architecture, Finacle enhances digital transformation and seamless integration with modern systems. It improves service reliability, workflow efficiency, and customer experience, making it a strong choice for banks focused on innovation and long-term growth.

### What do we do?

Sage Systems has a dedicated team of Finacle specialists with strong industry expertise and hands-on experience in banking technology environments. Our professionals are fully equipped to develop, implement, customize, and support Finacle solutions to meet each client's operational and strategic needs. Whether it involves system enhancements, new module rollouts, integrations, or day-to-day issue resolution, our team ensures smooth performance and maximum value from the Finacle platform. We focus on delivering reliable, secure, and timely support, helping financial institutions optimize their banking operations and elevate customer service. Sage Systems stands as a trusted partner for all Finacle-related requirements.

## End User Support

We are committed to consistently providing unwavering support and top-notch services to our customers, ensuring that they derive optimal benefits from the solutions we offer. Our existence in the industry is intricately tied to the customers we serve and the communities in which we operate. Recognizing this, we strive to deliver exceptional services that not only meet but exceed our customers' expectations.

At the core of our philosophy is the understanding that the strength of our relationships with customers lies in the quality of the services we provide. By consistently delivering excellence, we aim to foster loyalty and trust. We believe that by prioritizing customer satisfaction, we not only enhance our reputation but also contribute positively to the communities we serve.

In essence, our dedication to unparalleled service is a testament to our commitment to customer-centric values and the lasting impact we aim to create in the industry and the communities we are a part of.

Following the initial implementation of solutions for the specific customer and their organization, we are committed to assuming complete responsibility for the ongoing maintenance of the system or solution we have delivered. Additionally, we will conduct a comprehensive training period for the customer, ensuring a thorough understanding of the system. Should any adjustments be required during the testing phase or later to align the solution with the customer's preferences, we willingly accept the responsibility for implementing those modifications. Our dedication to ensuring the success and satisfaction of our clients extends beyond the initial deployment, emphasizing ongoing support and flexibility to meet evolving needs.

A solution or system is a long-term investment for customers, who anticipate achieving 100% results from their purchase. In line with this commitment, we are dedicated to customizing the solution to meet the unique needs of each customer, ensuring optimal satisfaction and performance over the entire duration of use.

## Conclusion

Sage Systems, a dynamic company surging ahead in the industry, is committed to providing an unparalleled experience to its customers by leveraging the latest technology available in the contemporary world. Our vision at Sage Systems is to emerge as a frontrunner among industry leaders, drawing inspiration from the visionary paths paved by entrepreneurs such as Steve Jobs and Bill Gates.

Our relentless pursuit of innovation propels us to explore novel avenues for enhancing organizational transactions and management processes. Striving for excellence, we are dedicated to refining our services, with the ultimate goal of establishing a robust customer base, driven by the ethos of fostering a "Paperless Environment in an Organization."

We firmly believe that aligning with these principles will contribute significantly to advancing "Green Environment Concepts" in our country. By championing sustainability and embracing cutting-edge technologies, Sage Systems is poised to make a substantial impact, ushering in a greener and more efficient future for organizations.
