

# AQUA ALLY

*Breeder & Exporter of Live Aquarium Fish & Plants – Sri Lanka*

## About Aqua Ally

Aqua Ally is a breeder and exporter of live aquarium fish and plants based in Sri Lanka — a tropical island globally renowned for its rich aquatic biodiversity.

The company was founded in 2017 by Shashitha and his wife, Thara, while both were engaged in other professions. Their journey began with pure passion for aquatic life and a shared dream to build something meaningful from the ground up.

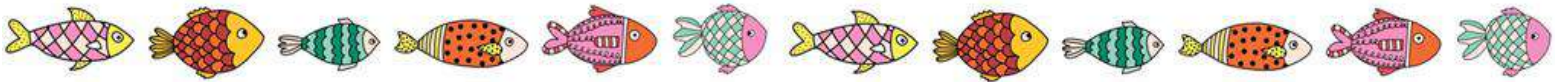

With no prior experience in the industry, Thara and Shashi started as aquatic farmers, establishing an eco-friendly mud pond farm spanning over 3,000 sq. ft. in Yatawatta, a scenic village in the Matale District of Sri Lanka. They initially bred popular freshwater species such as Carps, Goldfish, Mollies, and Swordtails. Hands-on experience in breeding, care, and water management quickly sharpened their skills and deepened their understanding of the aquarium industry's true dynamics.

In 2022, Aqua Ally proudly entered the direct export market, shipping its first international order to Qatar — marking a major milestone, as the youngest couple in Sri Lanka's ornamental fish export industry.

Since then, the company has grown steadily, earning the trust of leading importers in more than ten countries worldwide. Currently, Aqua Ally operates over 35,000 sq. ft. of mud ponds and an in-house fish quarantine facility capable of handling more than 100,000 fish at a time. Today, the company is recognized for its commitment to quality, sustainability, and customer satisfaction, offering a wide variety of freshwater, marine, and brackish water fish, as well as live aquatic and terrarium plants.

From humble beginnings to international recognition, Aqua Ally's story reflects passion, hard work, and respect for life beneath the water.

## Vision

**To share the beauty of Sri Lanka's aquatic life with the world — responsibly and sustainably.**

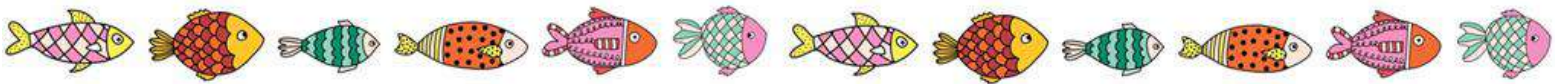

## Mission

**To breed and export healthy, high-quality fish and plants with care, teamwork, and respect for nature.**

## Our Values
