Coconut~ The tree of life

The background image shows two coconut seedlings with green leaves growing out of their husks on a sandy beach. The sky is blue with some white clouds. The seedlings are positioned on the left side of the frame, with one slightly taller than the other. Their shadows are cast onto the sand.

## Our Vision

To strive and maintain our position as a leading exporter with an emphasis on quality and reliability through continuous search for improvement.

To diversify and seek new avenues of trade and markets whilst observing the highest standards of business principles and ethics set down by our forefathers.

To leave a similar legacy for our future generations who will uphold the traditions and continue with the name of Adamjee Lukmanjee and Sons (Pvt) Ltd.

## About Us

Established in the 1860s, “Adamjee’s” as we are more popularly known, has become renowned in its core business as a pioneer manufacturer, processor and exporter of Coconut Oil, Copra and Desiccated Coconut. We are proud of our heritage as a prominent Trading Company in Sri Lanka, and have consistently maintained our position as one of the largest exporters of combined Coconut Kernel products.

Our Office, Warehouse Complex, and Processing Plant are strategically located in the heart of Colombo - the commercial hub of Sri Lanka, and within a 2km radius to the main port. Taking advantage of Colombo, fast becoming a major hub port of Asia, Adamjee’s has grown to become an Entrepot Trader of Coconut Products and Spices from all regions, to its buyers worldwide.

Being in the business of food commodities, we believe that the application of strict quality control measures is critical to any consumer. Adamjee’s has an unparalleled reputation for being a reliable shipper with an emphasis on quality goods, and maintains a fully equipped, modern, in-house laboratory to ensure 100% quality assurance. We are SLSI (Sri Lanka Standards Institute) and ISO 22000 : 2005 certified.

Our export products include Desiccated Coconut (Regular and Fancy Cuts), Coconut Oil, Virgin Coconut Oil, Copra, Coconut Milk/Cream, Coconut Milk Powder, Cloves, Cinnamon, Black Pepper, Nutmeg, Dry Lemon, Tamarind, Tropical Vegetable and Fruits and many other Sri Lankan Agri-Commodities.

The Company manufactures and markets its own brand of Coconut Oil under the brand N-Joy which is the only Natural Coconut Oil brand currently under ISO, SLSI and Halal certification in Sri Lanka. N-joy has also expanded to include Coconut Milk Powder and Coconut Cream under its brand umbrella. Additionally, Double Palm Brand, the company’s longstanding trademark for “Roasted” Coconut Oil enjoys a loyal niche market in South Asia.

Besides exports, our domestic division mainly imports and markets Animal Feed Ingredients such as Soya Bean Meal and Maize as well as several food commodities. Adamjee’s also import and nationally distribute Cement under its own brand “Saviya”.

The Company, with its longstanding reputation has built very strong associations with its suppliers and customers and this has been a key success factor in all our endeavours.

# Our History

The history of Adamjee Lukmanjee and Sons (Pvt) Ltd can be traced back to the mid 19th century when Adamjee Lukmanjee set sail on a pioneering voyage into an unknown future to Ceylon (Sri Lanka).

From humble beginnings and with implicit faith, he strove to create a foothold in a trading business in Pettah, the country's main wholesale market for Spices, Sugar and Pulses. Upon founding a flourishing sole proprietorship, Adamjee Lukmanjee relocated to our present premises in Grandpass in 1907, and became a pioneering Coconut Oil manufacturer in the country.

After establishing the company in manufacturing and trading, prudent investments in property and plantations were made to enhance the business. 1953 saw the incorporation of the Company and the subsequent installation of new Expellers and a Steel Drum Manufacturing Plant.

With sustained efforts over the years, we asserted ourselves in the trade, both here and overseas, the mainstay of our business being the export of Sri Lanka's major Agro-Produce – Tea, Rubber and Coconut.

The introduction of socialistic laws in the 1970s saw the total loss of all its estates and a majority of its properties. Despite all these setbacks, a gradual renaissance in the affairs of the Company allowed it to set up the only operational Solvent Extraction Plant in Sri Lanka in the early 1990s.

Adamjees is proud of its achievements for over a century and strives to maintain its position as one of Sri Lanka's leading exporters.

# Desiccated Coconut

## Desiccated Coconut – Regular Cuts

### Description

Desiccated Coconut (DC) – sometimes referred to as Coconut Powder, is a dehydrated form of granulated white coconut meat from freshly selected mature coconut kernels (the white flesh inside coconuts). It is white in colour, free flowing, and available in the standard cut sizes of **Fine, Medium, Super Fine**.

### Low Fat Desiccated Coconut

Generally DC is considered a full fat product. However a partially defatted product, which is the by-product after extraction of the milk, is also available and commonly termed as “Low Fat DC”. The fat content of this product can vary but is usually in the range of 45% - 55%.

### Use

Desiccated Coconut is perfect for use by various industries that require the natural exotic taste of coconut. It is widely used in the Confectionery and Bakery trades as toppings for cakes and pastries; fillers for candy bars; chocolates etc. Many households popularly use DC in the preparation of numerous dishes as well.

Virgin  
Coconut Oil

## Virgin Coconut Oil

### Description

Virgin Coconut Oil is extracted from fresh coconuts sourced from Sri Lanka's finest coconut plantations, both organic-certified and conventional. The extraction process preserves the natural goodness of the coconuts, including a superior lauric acid content. Virgin Coconut Oil is extracted under carefully controlled process conditions with great care taken to limit the temperature used during drying. After extraction, high quality filtration is the only process used.

Daily consumption of coconut oil has been shown to have multiple benefits. Due to the high medium chain triglyceride content, coconut oil is metabolized differently to other edible oils – being preferentially broken down in the liver for energy source as opposed to being transported around the body and deposited as fat. For this reason, coconut oil is used in both high quality infant milk formulas, as well as a supportive agent for critical care patients. Lauric acid has been shown to have benefits as a natural anti-microbial and anti-viral agent. Coconut oil also brings substantial improvement in the quality of life as a supportive measure for Alzheimers' and other neurodegenerative diseases.

### Use

Apart from the health benefits, virgin coconut oil is delicious as a delicately flavored oil suitable for dressing salads, garnishing main meals, stirred into your coffee or for direct daily consumption straight from the spoon.

Virgin coconut oil brings out your beauty inside and out, as a natural skin moisturizer and hair re-conditioner to give soft, smooth skin and lustrous hair that radiates.

Pure White  
Natural Coconut Oil

## Pure “White” Natural Coconut Oil

### Description

Sri Lanka, renowned for its superior coconuts, produces a special milling grade copra (coconut kernel) which is suitable for the manufacture of “White” Coconut Oil. Adamjees’ “White” Coconut oil is a pure, edible grade oil that does not go through any chemical refining process, thus allowing it to retain its natural flavor, aroma, and original fatty acid composition.

The oil is extracted from the flesh of copra and mechanically expressed without the use of solvents or chemicals of any kind. It is an excellent quality food-grade coconut oil that is NOT hydrogenated and contains NO trans fatty acids.

### Brands

- Adamjees Double Palm Brand “Roasted” Coconut Oil
- N-Joy Pure “White” Coconut Oil

### Use

Our Natural Coconut Oil, with its unique fragrance, is commonly used as an edible oil, as well as for hair and skin applications, and for the manufacture of cosmetics.

# Creamed Coconut

## Creamed Coconut

### Description

Creamed Coconut (Coconut Butter) differs from Coconut Milk in that it contains less water and more Coconut, so it has a thicker richer texture. It is a good source of concentrated coconut flavour, combining the creamy texture of Coconut with more fiber and energy than Coconut Milk.

### Use

This rich product is used as an ingredient for food and beverages that require coconut flavour such as yoghurts, sauces, soups, curries, ready meals and tropical/Caribbean applications. Commonly called coconut butter, it is a good lactose-free butter substitute with natural coconut sweetness and tastes good as it is spread on toast or used as a dip.

Coconut Milk

## N-Joy Coconut Milk / Aseptic Coconut

### Description

Coconut Milk is a sweet, milky white cooking base derived from the meat of mature coconuts. The cleaned coconut kernels (white flesh inside coconuts) are crushed to expel raw coconut milk, which is then filtered, homogenized and heat treated prior to packaging. Coconut Milk is available in varying fat percentages between 11% to 17%. Coconut Cream is like Coconut Milk, but thicker and higher in fat.

### Use

Coconut Milk finds a special place in many tropical cuisines. Sri Lankan coconut milk is reputed to be one of the most flavoursome milks and is ideally suited as a culinary base and known for its health benefits. Coconut Cream is very similar to heavy whipping cream and a great non-dairy substitute. Used as a major cooking ingredient for Asian dishes, desserts, puddings, rice cakes etc.

# Coconut Toasted Chips

Crispy, crunchy, guilt-free snacking... Conventional wisdom used to be that, higher fat foods were not healthy. However, now it's been well established that higher fat foods give a faster feeling of fullness and satiety thereby naturally limiting appetite, and that the prime underlying cause of the obesity and type II diabetes epidemic sweeping the world is actually high carbohydrate intake.

Toasted coconut chips are naturally rich in beneficial coconut oil so no added oil is used for toasting, and are lower in carbohydrate and higher in dietary fibre than potato crisps. Perfectly toasted to crunchy perfection, our range of finely seasoned toasted chips has something to suit every palate and occasion.

- Chocolate Coated
- Spicy Onion Toasted
- Chilli and Lime Toasted
- Sweetened Toasted
- Salted Toasted
- Ginger Toasted
- Pepper and Salt Toasted

A close-up photograph of a coconut drink. The coconut is cut open at the top, and a white straw is inserted. A small red flower is perched on the straw. The coconut is nestled in a white paper liner inside a wicker basket. In the background, other similar drinks with yellow and red flower garnishes are visible, though out of focus.

# Coconut/ King Coconut Water

## Coconut/King Coconut Water

### Description

From Kings to the common man, for centuries King Coconut Water has been the drink of choice in our island paradise. Its natural sweet flavor is the perfect thirst quencher for life in the tropics. Its hydrating properties are such that during World War II, King Coconut Water was used for direct blood infusion as a replacement for saline. The natural high levels of potassium act as the ideal sports drink in replenishing that lost through sweat during exercise, allowing your muscles and nerves to function at their peak.

King coconut water from Sri Lanka is sweeter and tastier than most of the commercial coconut waters sold in consumer packs. The taste profile makes it ideal as a single strength juice, and also as a substitute for water in juice blends in order to make a 100% juice. Adamjee's king coconut water can be shipped either as consumer packs or in bulk for reprocessing.

RETAIL

SPICES

**Cloves** (*Eugenia Caryophyllus*) are the aromatic dried flower buds of a tree in the family Myrtaceae and impart a strongly aromatic fragrance along with a fiery taste. Cloves are used in a variety of food preparations as well as in Ayurvedic / Chinese medicine, and dentistry where the essential oil (extracted from the leaf) is used as a painkiller for dental emergencies.

**Packing:**

25Kg 5 ply cartons.  
Other sizes available upon request.  
We also offer a superior quality hand sorted lalpari quality cloves. The clove stems too can be offered.

**Product Characteristics**

Moisture	12% max
Colour	Reddish Brown
Extraneous Matter	0.5% max
Clove Stems	3% max

**Container Capacity**

1 x 20' FCL – 11MT

**Black Pepper** (*Piper Nigrum*) is produced from the still-green unripe berries of the Pepper plant through a brief process of cooking and drying. Sri Lankan Black Pepper has a very high Piperine content (the alkaloid responsible for the pungency of Black Pepper), and is widely used as a “hot” cooking spice and seasoning.

**Packing:**

Standard packing in new single jute bags of 50Kg nett each.  
Other sizes available upon request.  
We also offer same in FAQ (Fair Ave Qu) as well as in machine cleaned as well as steam sterilized pepper as per market rates.

**Product Characteristics**

Moisture	14% max
Bulk Density	500 & 550 g/l
Extraneous Matter	1% max
Light Berries	4% max
Pinheads	0.5% max

**Container Capacity**

1 x 20' FCL - 14MT

**Cinnamon** is the dried scraped peel of the inner bark of an evergreen tree (*Cinnamomum Zeylanicum*) that is indigenous to Sri Lanka. Cinnamon is mainly sold in the form of **Quills** - several peels joined together by overlaps, the hollow of which has been filled with small pieces of the same peel.

Off-grades such as **Quillings**, **Featherings** and **Chips**, which are made up of broken pieces and unpeelable bark, are also traded. Cinnamon with its woody, mild yet exotic flavor is arguably the most popular spice in the world. Besides its many uses in baking and cooking, it also provides a wonderful aroma to freshen your home.

**Product Characteristics**

Diameter of Quills	6 – 38mm
No. of 1050mm/42 in quills min (per Kg)	7 - 45
Permissible overall extent of foxing	0 - 65

*Characteristics vary according to grade*

**Container Capacity**

Cinnamon - H1, H2, C4, C5 – 1 x 20' FCL- 6.8MT  
Cinnamon Chips, Quillings, Featherings – 1 x 20' FCL- 6MT

**Packing**

Cinnamon - H1, H2, C4, C5 - 45.36Kg Cylindrical Bales  
Cinnamon Chips, Quillings, Featherings - 25Kg Polypropylene Bags

All Spices are also available in ground form

# Spices

## Sesame

Sesame is an oil seed with a rich nutty flavour produced from Sesame Indicum. Sesame is thought to be one of the oldest oilseeds known to mankind, and is used for either oil extraction or for direct consumption as an ingredient in many cuisines. Sesame oil is very stable and has a long shelf life due to the presence of natural antioxidants, and is an omega-6 –rich oil used in cooking, in margarines and as a salad oil.

### Packing

Packed in 50Kg Jute Bags or as per request

### Container Capacity

1 x 20' FCL = 10MT (50Kg packing)

## Nutmeg

This is a spice derived from the plant of the Myristica fragrance genus while the red membrane that covers it is made into the spice mace. Nutmeg is used in a variety of cuisines and is traded in both shelled and unshelled forms.

Nutmeg is also available in BWP grade for extraction process.

### Packing

Packed in 50Kg Jute Bags or as per request

### Container Capacity

1 x 20' FCL = 10MT (50Kg packing)

## Mace

The dried red/yellow covering/aril on the surface of the nutmeg shell is used in many food preparations as a spice. It has a distinct flavor as well as a unique colour that enriches the preparations.

### Packing

10Kg packed in cartons.

We are an importer and quality supplier of all types of pulses and special crops. Products are sold in bulk and in bags according to customer requirements.

### **Packing**

As per requirement

### **Red Split Lentils**

Canadian and Australian varieties of Robin lentils include Sortex Quality.

# Amra Hair Oils

## Amra Hair Oils

### Description & Use

**Amra Pure Coconut Hair Oil** Specially selected herbs such as Nelli (Amla), Keekirindiya (False Daisy), Uluhaal (fenugreek) as well as Vitamins A and E in Amra Pure Coconut Oil enhances the blood circulation of the scalp and adds moisture to dry hair, reduces hair fall and dandruff while stimulating the growth of lustrous and beautiful hair.

**Amra Pure Virgin Coconut Oil** Amra Pure Virgin Coconut Oil provides a combined solution for both your hair and skin. Rich in Vitamin E and having natural conditioning properties, it gives you a well nourished scalp while leaving your hair soft and silky. It is an excellent skin moisturizer, easily absorbed into the skin and facilitating the removal of dead skin cells, resulting in a soft, smooth skin that radiates good health.

**Amra Herbal Hair Oil** Amra Herbal Hair Oil is produced to a traditional recipe containing Nelli (Amla), Gotukola (Centella Asiatica), Karapincha (Curry leaves) and Watakeiya (Padanus) combined with white oil. This helps strengthen your hair roots whilst preventing hair fall, split ends and premature graying. Being non-sticky, it allows you to style your hair with ease, while its pleasant fragrance lingers all day long.

#### Container Capacity

**Hair Oil - 1'x20' FCL - 6000 cartons**  
(12x1000ml per carton)

Animal Feed  
Ingredients

### Soya Bean Meal

Soya Bean Meal is the most preferred feed ingredient used to add protein to animal diets-especially for poultry feed worldwide. It contains around 48% protein and is obtained after the extraction of most of the Soya oil.

#### Quality Specifications

Protein	48% min
Moisture	12% max
Fibre	06% max
Sand Silica	2. % max
Fat	2% max
Urease Activity	
0.3 Unites Mg/N/G/M at 30 Degree Centigrade by EEC Method.	

### Di-Calcium Phosphate

DCP is extensively applied in improving the hybridization, pregnancy and survival rate of livestock. This is a mineral that has the properties of anti-plague which helps in avoiding rickets, paralysis, diarrhea and soft-shell and also prevents pigs and poultry from disorderly feeding thus helping in their growth and increasing the output of eggs and meat.

#### Specification

Total P:	18% min
Calcium:	21% min
As F Unit:	0.18% max
As As Unit:	30PPM max
As Pb Unit:	30PPM max

### Copra Expeller Cake (Poonac)

This is a by-product of the Coconut Oil manufacturing process, i.e. the residue left after the partial or complete removal of oil from Copra. It is a valuable Animal Feed Ingredient considered to have a high Fibre and Protein by-pass value and found to be extremely palatable amongst cattle.

#### Specification

Moisture	10% max
Crude Protein	22% min
Crude Fibre	13% min
Fat	6 -12%

### Maize

The main compound of the poultry feed manufacturing is maize. This is used as the main energy source of the feed.

#### Characteristics

#### Requirements

	Grade 1	Grade 2	Grade 3
Moisture, per cent by mass, Max	14.0	14.0	14.0
Foreign matter, per cent by mass, Max	0.5	1.0	1.5
Type admixture, per cent by mass, Max	4.0	8.0	12.0
Damaged grain, per cent by mass, Max	0.5	1.0	2.0
Insect damaged grain, per cent by mass, Max	0.5	1.0	1.5
Immature grain, per cent by mass, Max	1.0	2.0	4.0

### Rapeseed Meal

The by product obtained after the rapeseed is processed is known as rapeseed meal. It is rich in protein and used for poultry and cattle feed.

#### Specification

Protein/Oils & Albuminoids :	38% min
Moisture :	10% max
Fibre :	12% max
Sand/Silica :	2.5% max

## Saviya Brand Cement

We import and supply Ordinary Portland Cement (OPC) that is used in all general construction, especially in major and prestigious projects where cement is needed to meet stringent quality requirements under the close supervision of Sri Lanka Standard Institution with SLS 107 approval.

We maintain our technical standard of quality parameter at high level and with high strength at all ages. Our OPC cement satisfies EN 196 / 197 – 1, SABS, BIS, SLSI & PSS – 232 ~ 1983 (R).

## ALS Engineering (Pvt) Ltd.

ALS Engineering (Pvt) Ltd, is engaged in importing pumps and valves in Sri Lanka. We supply end suction, split casing, vertical and horizontal multistage pumps for various industrial applications. We specialize in supplying building services pumps and process pumps.

We stock large number of pumps used for Fire fighting, Air conditioning and Water supply systems and 30 - 45 kW electric motors.

We undertake projects to supply, install and service pumps and pumping systems for Hotels, Commercial buildings, Water intakes, Water distribution, Sewage systems etc.

Our technical team include overseas trained engineers and have ample experience in installation, maintenance and repairing pumps and pumping systems. Our workshop is well equipped with tool and machineries required for installation and service of pumps of all sizes.

### Applications ;

- Air-conditioning (1450 and 2900 rpm, VSD compatible)
- Fire fighting (FM/UL, NFPA 20)
- Water supply, Agriculture and Storm water
- Sugar, Edible oil, Textile and Process industries
- Petroleum refineries, Chemical and Process industries
- Pressure Booster systems
