AN
ADVENTURE
WITH
COCONUT

Ceylon Coconut Company is a young and dynamic company set up in 2014 to develop a brand name for our coconut products from Sri Lanka, formerly known as Ceylon.

Our focus is to build up an exclusive range of value added coconut products, whilst supplying the best quality traditional coconut range. We are continuously doing research and development for innovative and high quality organic products that meet the ever changing consumer.

We invite you to join us in spreading our tradition of healthy living to your communities. We are eager to support partnerships with global businesses, irrespective of size, to organically grow the culture of natural healthy living, and support consumer demand for specific diets such as vegan, paleo and LCHF, through our traditional and hand crafted range of products.

THE LIFE CYCLE OF A COCONUT

Cocos nucifera, the coconut palm, also known as the tree of life, is cultivated for its fruit and fiber. It thrives in tropical climates such as Sri Lanka, and it is a primary source of our food and a major export product for the island.

The species has been cultivated since prehistoric times, and throughout the globe it has naturalized in subtropical areas, primarily in coastal regions.

Coconut palms are medium-sized, solitary herbaceous plants. Although tree-like in form, their trunks are composed not of wood, but of fibrous, stout, overlapping stems, and may grow to 25 m tall (80 feet), topped by a crown of pinnately compound leaves up to 4 meters (15 feet) long.

The coconut is a versatile product for domestic, commercial, and industrial uses of its different parts. The daily diet of a Sri Lankan is at least 20-30% coconut. The flesh of the coconut when dried is called copra. The oil and milk derived from it are commonly used in cooking and frying; coconut oil is also widely used in soaps and cosmetics. The clear liquid coconut water within is a refreshing beverage and can be further processed to create alcohol, commonly known as Coconut Arrack. The husks and leaves can be used as material to make a variety of products for furnishing and decorating. It also has great ayurvedic, medicinal and religious significance in Sri Lanka.

Coconut oil was once avoided because of its saturated fat composition, which was thought to raise cholesterol. However, research now suggests otherwise because of the medium-chain triglycerides (MCT), and how they are digested by humans. Since MCTs are digested quickly by the liver after consumption, it had been found that it helps to improve cardiovascular health. Coconut has now become popular as a health food, with numerous products and websites extolling its benefits.

The coconut from Sri Lanka aka Ceylon is of superior quality, taste and flavor when compared against global supply because of its naturally occurring higher beneficial fat percentage, which averages at over 72% in the coconut meat, whereas the average global fat percentage in coconut meat is 62% - 68%. Desiccated coconut, a key ingredient in the confectionary industry originating from this small island is naturally bright-white and does not need chemical bleaching or deodorizing unlike other supplier countries.

As our domestic consumption is high, at around 80% per annum, given that no meal is complete for a Sri Lankan without coconut, the amount of produce available for export is comparatively small. Hence the premium price of coconuts with Sri Lankan origin; which is ultimately reflective of higher quality and lower product availability. However, if you do source from this island, you can rest assured that you are easily getting the best coconut produce in the world.

ORGANIC COCONUT BUTTER

ORGANIC COCONUT HONEY

ORGANIC COCONUT SUGAR

ORGANIC COCONUT AMINOS

ORGANIC COCONUT VINEGAR

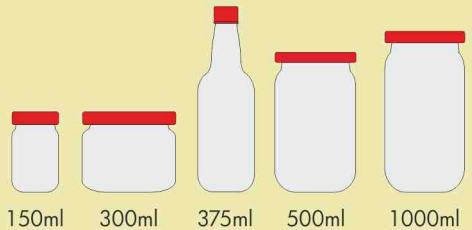

ORGANIC KING COCONUT WATER

ORGANIC COCONUT MILK & CREAM

ORGANIC VIRGIN COCONUT OIL

Product Sizes & Packaging Options

Description: Virgin coconut oil is obtained from the mature kernel of the coconut (*Cocos nucifera* L.) with the application of minimal heat which does not lead to alteration of the product. It is considered to be a “solid fat” with melting properties near room temperatures. Water-like in appearance when in a liquid state. One of the cleanest tasting oils. Highest natural source of medium chain triglycerides (MCT) and Lauric Acid.

Ingredients: 100% Organic Virgin Coconut Oil.
No Preservatives, No Additives, No Artificial Flavour or Colours

Processing: Cold pressed and Unrefined.

Colour & Appearance: Colour 25mm cell on the Lovibond colour scale in Y+5R not deeper than 1. Clear, free from visible foreign matter.

Food Application: Widely used in confectionery applications as a central fat, ice cream bar coating fat, frozen whipped toppings, coffee whiteners, baby food, geriatric food, roasting oil for nut meats, calf milk replacers, sauces, cooking oil, beer flavouring, coffee flavouring, tea flavouring, cakes, cookies, chewing gum, granola bars, etc.

Non Food Application: Cosmetics, Body and Hair product ingredient.

Dietary Info

Product Sizes & Packaging Options

500g

1 kg

Description: Coconut Flour is the screened food grade product obtained after drying and expelling oil from the coconut kernel. High in dietary fiber. Contains lauric acid and MCT oil. It is cholesterol free and non-trans fat and ideal as a gluten free alternative in cooking.

Ingredients: 100% Organic Coconut.

No Preservatives, No Additives, No Artificial Flavour or Colours

Processing: Coconut flour is a cream white powder prepared from residue of Virgin Coconut oil extraction. The residue which is cream in colour is milled to a fine powder.

Colour & Appearance: Cream white powder which on occasion may have brown specs from the brown shell of the coconut.

Food Application: Can be used to make bread, cakes, pies, cookies and other baked goods. Use to replace 15% - 50% of other flours. Can be used to thicken gravy, as a bulking agent and as an emulsifier.

ORGANIC COCONUT AMINOS

CU835581

LK-BIO-149
Non-EU Agriculture

Product Sizes & Packaging Options

250ml

375ml

Description: Our Organic Coconut aminos are a delicious natural seasoning sauce made from coconut sap. It is dark, rich, salty and slightly sweet in flavour. It resembles a light soy sauce or tamari (wheat free soy sauce), but it is soy free and gluten free – making it the perfect replacement for specific dietary needs.

Ingredients: Organic coconut sap honey, organic coconut vinegar, onion, garlic, sea salt and spices.

Processing: The coconut sap honey and ingredients are fermented and aged for 3 months in a vat. Other ingredients are added based on specific flavouring and then pasteurized.

Colour & Appearance: Dark brown Liquid

Food Application: Cook, marinate, salad dressing, sautés, use as a condiment and as a gluten free soy free alternative.
