Dedicated Teams

CLIENT

CREATIVE SOFTWARE

HOME TEAM

TEAM SRI LANKA

At Creative Software we are experts in building and managing dedicated teams of software engineers who become a regular part of your in-house workforce, contributing to the development, maintenance and support of your software applications.

Once established, your in-house workforce and dedicated engineers at Creative Software will function as one team sitting at two locations.

Microsoft

Although they may not sit at our headquarters in Gothenburg, our dedicated engineers at Creative Software are essentially our team.

We have a longstanding collaboration during which they have been as invested in our projects as our in-house developers.

Bengt Nilsson

CEO

PAGERO

Why Creative Software?

Find the Right Talent Quickly

As one of the pioneers and leaders of Sri Lanka's ICT industry, Creative Software has a strong brand name and attracts the country's best talent.

We help you find the right talent and onboard them quickly.

Build & Retain Domain Expertise

Our staff retention rate is consistently above the industry average. This enables us to build and retain domain expertise on our clients' software applications - a prerequisite for any distributed development initiative to be successful.

Be Agile & Responsive

We help you respond to your organisation's resourcing needs promptly, scaling teams up to take advantage of new business opportunities as they arise, or scaling them down when your business so requires.

Increase Value

Become more competitive.
With a dedicated team at Creative Software you can grow your business cost and time-efficiently, without compromising quality.

03

Areas of Expertise

Our ever-evolving areas of expertise include:

Web

Mobile

Big Data and Analytics

Internet of Things

Integrations

Enterprise Applications

Cloud Services

DevOps

Technologies

Java

django

RAILS

HYBRID
Mobile Development

iOS

ionic

X

A

B

and more

Our dedicated teams are built to match each client's unique requirements.

We work with all the leading programming languages, technologies and platforms so that we are able to staff your team with the exact skills you need.

Our Agile Process

Our Agile process is optimised for distributed development.

We work with you to fully understand your requirements and together we create and prioritise development tasks based on business value and potential risks. We then move into the development phase where software is delivered in iterations (sprints).
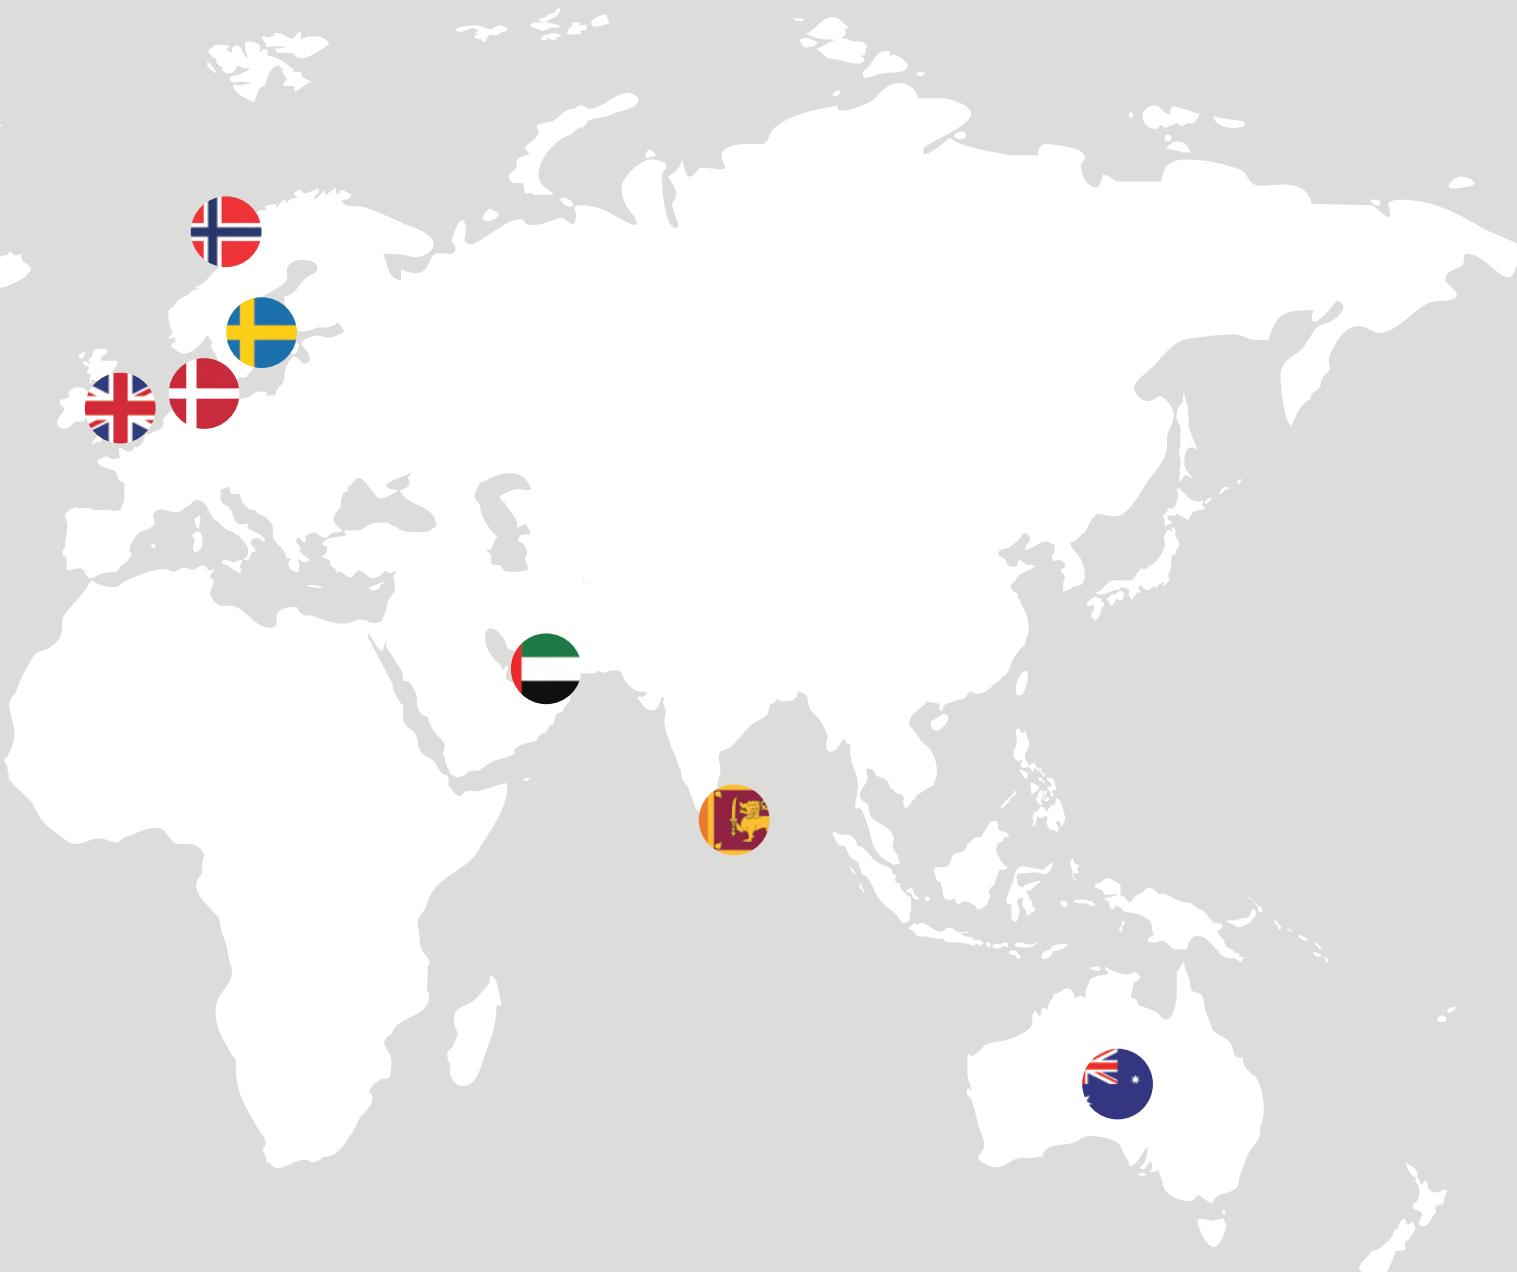

Our Clients

04

Our clients are in Scandinavia, United States, United Kingdom,
United Arab Emirates, Sri Lanka and Australia.

Client Testimonials

I am very satisfied with the technical proficiency of the staff assigned to us at Creative Software and how quickly they grasped the complex functionality in our products.
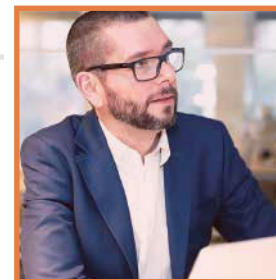

The relationship we developed with them made it possible for us to move a significant portion of our work offshore while maintaining our extremely high quality standards. This is particularly impressive considering how quickly we expanded the team in Sri Lanka.

Hans Rune Rønningen
General Manager

We are a small company with an informal culture where everybody has to be a self-starter. The team at Creative Software fits well into this environment; the team members are motivated, highly skilled and take initiative to get the job done.

Client Testimonials

PAGERO

I think the key to the success of our dedicated team is transparency and effective communication.

We have complete visibility of the performance of our team and communicate with the Sri Lanka team members as with any other Pagero employee. That gives us a lot of flexibility and it builds trust.

Bengt Nilsson
CEO

QMATIC

We view the team at Creative [Software] as an extension of our existing development team and they play a key role in contributing to the continued development of our products.

Martin Hallberg
VP R&D

Why Sri Lanka?

With a highly skilled English-speaking workforce, universities that are among the best in the world and a stable business environment, Sri Lanka has emerged as one of the world's leading destinations for software outsourcing.

Education - a South Asia Leader

Sri Lanka's literacy rate exceeds 98% making it the leader among South Asian countries. Universities are highly selective and have rigorous admission criteria.

Loyal and Creative Workforce

We strive to be welcoming and collaborative. Our multicultural society with many external influences promotes tolerance, understanding and the ability to collaborate effectively with people from different parts of the world.

Competitive Cost

A.T. Kearney recognises Sri Lanka as one of the top 15 outsourcing destinations in their Global Services Location Index based on its financial attractiveness, resource quality, and stability of business environment. The country was described as "one of the hidden jewels in the offshoring space."
