Millennium Information Technologies (Pvt) Ltd

The IT architecture company

London
Stock Exchange Group

Business Interests:

Core infrastructure solutions Here is where the mission-critical solutions – data centre and server environment provisioning, monitoring and administration, server virtualisation – come in, together with networking solutions that may include IP, VoIP or IP TV as well as next-generation technologies. This is also the area in which MillenniumIT has been a market leader since the 1990s. Whatever you need, we can supply.

Security Solutions It's a jungle out there, and the predators can be deadly. Millennium Enterprise can provide your business with a security framework covering policy, design, implementation and operations your entire field of operation, covering people, processes and infrastructure as well as governance.

Near-field communications Already growing at a tremendous rate in developed markets, near-field communication is short-range wireless technology that allows people to perform transactions and exchange data with different devices like a card, or mobile-phone equipped with a special chip by placing it in proximity to a reader. We provide the technology platform 'T-GateTM' to support a wide variety of business applications such as an employee fuel quota system, transport ticketing and e-money systems for retail payments. MillenniumIT have built the platform to support these innovative services in conjunction with the technology originators.

Business collaboration technologies Improve your corporate communications through integrated desktop optimization and virtualisation, IPT voice and video solutions, community networking and email, instant messaging, chat apps, mail conferencing and collaboration tools. Whether it is an installed enterprise desktop software environment or a service environment available from a private or public 'cloud' such as our Microsoft Office 365 cloud offering, we can help you tailor a solution to your needs and improve your user experience of IT services.

Enterprise performance management Our capabilities cover the whole cycle from consulting, design and implementation of performance-management solutions to operation and applications support. They include identity and access management, information archiving and warehousing, middleware solutions to access distributed information sources, document-management solutions, information analysis and presentation tools. We specialise in Share-point Development as a presentational interface for your information sharing, workflow management and performance reporting applications.

Areas of Specialisation:

- Systems and Network Integration
- Coverged Communication over IP
- OSS/BSS
- Information Security
- Messaging, Collaboration and Identity Management
- Server and Storage Solutions
- Database and Business Intelligence
- High-performance IT infrastructure for capital market firms
- Application server and middleware
- Customer Relationship Management
- Share-point development
- Enterprise server infrastrucrure, application and desktop virtuallisation
- Private and Public cloud offering

MillenniumiT is the IT architecture company!

Millennium Information Technologies (Pvt) Ltd (MillenniumIT) is the systems integration business of the MillenniumIT Group and a member of the London Stock Exchange Group. Built around the five main pillars of Core Infrastructure solutions, security solutions, near-field communications, business collaboration technologies and Enterprise performance management, MillenniumIT is supported by a highly skilled, experienced team of professionals. The teams' visionary leadership and the resulting success of projects have secured the confidence of our clients.

For the Telecommunications industry, MillenniumIT architects, deploys and maintains carrier-class IP based Next Generation Networks (NGN) for service providers, integrating complimentary revenue generating solutions around them.

In the Enterprise space, MillenniumIT uses the open standard based, scalable infrastructure as the platform to architect, deploy and maintain its solutions. Businesses leverage on this to offer value added services to their customers, while lowering cost and improving their productivity.

MillenniumIT's process driven project management team consists of PMP (Project Management Professional) trained and certified professionals who ensure successful implementation of all our solutions. This is complemented by our certified support teams, who use proactive customer service initiatives to ensure system availability and capacity planning for future growth of our clients.

You want to do what you do, not waste your time running IT operations. That's our speciality, so leave it to us. Our accredited, managed IT services include managing clients' in-house core IT infrastructure as well as 'hosted' IT services, in which we host and manage clients' core applications and supporting infrastructure on our premises. Hosting offers flexibility, cost-effectiveness and operational efficiency and is particularly fitted for clients for whom high availability of IT resources is critical. Add to this our proven record of excellence in supporting offshore IT operations services to demanding international capital markets clients and the value proposition is unbeatable.

Services:

- Consult and design to address business benefits and IT investments
- Installation and Integration of solutions within time and budgets
- Customised support and maintenance solution ensuring 24 x 7 system availability and optimization
- Managed Services – Accredited ISO 20000 and ITIL aligned best practice approach to IT service management
- MillenniumIT operations (ITO) specialize in outsourced IT Operations for capital market firms
- Application as a Service - operation of your IT infrastructure and applications provided as a service
  – hosting , connectivity and service management delivered as a single package so you can concentrate
  on your core business and leave us to manage your IT.
