ABOUT US

The story of Tealia Tea dates back to year 2001 when the family run enterprise, Maltras International (Pvt) Limited was launched in Sri Lanka with the vision to create a tea for every tea lover -from tenacious tea drinkers to tea connoisseurs. Today, our premium brand Tealia has become a household name amongst tea enthusiasts around the world with our global reach having expanded in the recent years to cover international markets such as Russia, USA, Canada, Japan, UK, Hungary, Germany, Australia, China, India, Taiwan, Korea, Czech Republic and New Zealand to name a few.

The success of our tea brand, we believe, is driven by our determination and constant effort to match our consumer needs through creation of best premium blends to suit everyone's palate. Running parallel is our desire to make tea drinking a wholesome experience for our consumers; to offer a blend that whets the appetite; a delicate scent that invigorates the senses- the ultimate rejuvenation for body and mind.

Tealia's vivid blends come in loose leaf and pyramid bags to optimize the tea drinking experience. While the exclusive pyramid bag offers more room for the mix of tea leaves, natural fruits, flowers, spices and herbs, its unique shape lets these ingredients blend freely in your cup to create the best brew.

We are a brand that values sustainability. Our tea is therefore sourced only from plantations that follow ethical practices and conform to Rainforest Alliance standards.

Why Ceylon Tea?

Many countries in the world grow and process black tea and green tea, yet there is no origin to match the quality and the goodness of Ceylon Tea- a uniqueness resulting from the distinct climatic conditions and varied soil compositions inherent to the island. With monsoon rains creating two distinct weather patterns in the eastern and western sides of the island, the country's tea produce adapts subtle differences in characteristics and flavour that only Ceylon Teas can offer.

Hence we take pride in offering Single Origin teas to our consumers.

Our Operations

As our premium blends gained popularity across the globe, in 2015 we took to commissioning our modern factory and office premises in Kaduwela with a view to provide our consumers, a service of excellence. While the state of the art facility conforms to all international standards - ISO 22000 of 2005 including HACCP, Organic EU, Organic NOP, all aspects of our operations in the premises adhere to the 5S system.

Our new packing installations include a fully automated blending and flavouring drum to ensure uniformity of each and every blend that goes into our packs while IMA double chambered machines are used for packaging the two types of teabags and the pyramid bagging FUSO machines for packaging the up-market range of blends. In the light of the recent medical and scientific findings highlighting the importance of quality packaging material, we opted for the plant based 'Soilon' material which is a biodegradable type, for packaging all our tea bags.

BLACK TEA

Black tea, rich in antioxidants, remains the most sought after beverage, globally. Its healthy substances, scientists believe, reduce health risks such as cancer, cholesterol and cardiovascular diseases. Since the British introduced the tea plant *Camellia sinensis* to Ceylon in 1867, the Island boasts of a long and proud history of producing the best and cleanest tea in the orthodox style of manufacturing. Our brand presents a wide selection of black teas from this single origin which boasts of a 150 year long proud heritage, manufactured in the traditional orthodox way in compliance with best manufacturing processes, to create the Tealia range that in essence, is a blend of the natural endowments inherent to the island resulting from the alchemy of land, soil and the climatic condition and years of expertise harnessed through research and development.

Tealia takes the very best of Single Origin Ceylon Tea leaves, coming from tea gardens that follow ethical practices, to create its selection of teas infused with natural fruits, spices and herbs- each having its varied and alluring taste that makes the consumer comeback for more; thirsty for that pleasurable adventure of aroma and flavours.

GREEN TEA

Green tea, we believe, is the nature's miracle remedy. A pack full of immune boosting goodness; with anti-ageing properties that reduce significant damage to skin and hair; having the power to fight cancer cells of varied diseases -breast, esophageal, prostate or stomach; tea that help you lose weight and feel great as these natural tea leaves hold the magic of nature within them.

We at Tealia take advantage of the distinct characteristics of green tea from Ceylon, with inherent qualities that the plantations provide during each season as they are harvested, to create our green tea range. A smooth, flavorful, mild beverage which can be enjoyed any time for its relaxing properties and the richness of its anti-oxidants. Savour the distinct taste and subtle aroma of our green teas as you sip from the very fountain of life.

HERBAL INFUSIONS

Our fruit and herbal teas are simply healing. A fusion of contemporary and the traditional, this innovative Tealia range includes the classic Simply Mint to more random tastes such as Chamomile Apple and Strawberry Hibiscus Rosehip. A perfect fit for both winter and summer. Ideal after supper as iced teas. Immerse yourself in our herbal tea world filled with the delightful array of flavours.

DESSERT TEA

Our fruit and herbal teas are simply healing. A fusion of contemporary and the traditional, this innovative Tealia range includes the classic Simply Mint to more random tastes such as Chamomile Apple and Strawberry Hibiscus Rosehip. A perfect fit for both winter and summer. Ideal after supper as iced teas. Immerse yourself in our herbal tea world filled with the delightful array of flavours.

ORGANIC TEA

Our certified organic tea range, prepared in the true spirit of sustainability, brings you the finest blends made from the finest ingredients, adhering to the best manufacturing processes. Quality whole loose leaves, rough cut herbs and real flowers come together to create our organic teas, endorsed with EU, USDA and JAS certifications –reflecting our brand’s commitment to offer blends that are both people and eco-friendly.

SILVER & GOLD

An exclusive tea, hand-made following a careful and controlled process of plucking and processing. The leaves are handpicked by specially trained tea pluckers, who, at pre-dawn set out to selectively collect only the buds -the freshest and youngest part of the shoot. These buds are sun or air dried and rolled to give the final product. With maximum natural chemicals and anti-oxidants present in these buds, white teas having anti- bacterial anti-virus effects are also a weight-loss cure and give the consumer a 'power pack' with each sip they take.

There is a discernable colour difference in the products; some are golden/yellow in colour and referred to as 'Golden Tips' while those that are whiter in appearance are known the 'Silver Tips.' Unique and rare Golden Tips and Silver Tips are an incredible indulgence.

CEYLON REGIONAL TEA

The terrain of the Island of Ceylon is made up of flat plateaus to high mountains of 2000 meters where the temperatures too differ. Tea plantations, in each region offer a tea with characteristics that are unique to the place they are grown. From high grown to low grown teas, the flavour, aroma and hue of the cup differs, making the island; known as Ceylon back then; a tea grower's paradise. Tea Leaves for most of our blends in the Tealia range are coming from Dimbulla, Uva, Kandy, Ruhuna and Nuwara Eliya - the most popular tea growing regions in the country with a uniqueness of their own. With a deep rooted history in growing tea, coupled with the time-honoured method of perfecting, each of these tea blend, advanced by our brand to suit the modern day tea drinking and the needs of all our tea lovers both young and old, brings something more than an average brew.

GIFT TEA

At Tealia, we believe tea is a gift. Each leaf is nature's extension of her gift to us. We have taken this notion a step ahead by crafting our gift range to enable you share the joy of tea with your loved ones. Some of our popular blends, we have even dressed up in stylish packaging, to fit the season. A sophisticated gift we'd all love to receive and give!
