# WONDER SPICE CINNAMON

Cinnamon; the brown dried out bark of the cinnamon tree, which comes from the branches of natural trees that fit in to the group "Cinnamomum" (an evergreen lasting plant with spirally prearranged, broad laminated dark green leaves having palmate venation), is one of the most noteworthy and oldest spices cultivated in Sri Lanka.

The best spice presented in terms of its nutrition and healthiness, Cinnamon is rich in dietary fiber, calcium, iron, magnesium and zinc - all immense nutrients for expecting and nurturing moms. Cinnamon has exclusively strong curing properties thanks to the active components in the vital oils found in its bark.
