SLEEP WITH NATURE

LALAN ECO-LATEX

WHO WE ARE

The Lalan Group is one of Sri Lanka's largest diversified conglomerates, with an extensive global network encompassing pan-industry interests in rubber, tea, and other plantation manufacturing; service industries; engineering and the leisure sector. Established three generations ago in Sri Lanka, the Group, which started primarily as a rubber commodity trading operation, has expanded, developed, and modernized its operational modalities in keeping with global changes.

However, the group remains rooted in the family company's traditional, socially, and environmentally conscious values.

LALAN ECO-LATEX is a wholly owned subsidiary of LALAN, focusing on manufacturing sustainable sleep solutions for the home furnishing industry.

We are currently operating three business models.

1. Manufacturing Organic Latex foam for bedding and furniture industry worldwide.
2. GOTS certified bedding and mattress manufacturing factory for sustainable and organic home textile retail brands worldwide.
3. Recycling off cuts from above two manufacturing process to reduce solid waste disposal. We are manufacturing an eco-friendly medium and high density rebonded foam from post manufacturing fall offs. rebonded foam is used in many industries for insulation, furniture cushioning and packaging. Rebonding process drastically reduces the solid wastage of the polymeric material which takes a long time to biodegrade.

Eco Latex is committed to practice Science Based Targets initiatives to reduce the Carbon footprint. Our current business operation which has a balance between emitting carbon and absorbing carbon from the atmosphere in carbon sinks through, reduce water consumption by adopting to new methods and technologies and introduce water recycling systems wherever possible. Recycling post manufacturing offcuts into regenerated raw materials.

We are constantly developing new products using natural, sustainable, and recycled materials.

Our drive to reduce the Co2 emission is practiced in two methods:

1. Lalan Group is maintaining 17000 hectare of rubber plantation and practicing a continues replanting program.(A rubber tree is capable of fixing ca. 1 MT of CO2 during its 30-year economic life cycle and therefore, within a hectare of rubber having over 300 trees, a minimum of 300 MT of CO2 sequestration.
2. Conserving energy through new technology, continues training and process improvements.

OUR CERTIFICATIONS

CU 827360

GOLS

Certification confirming that Rubber trees are grown in a USDA certified organic plantation and latex foam is manufactured while protection the local communities livelihood and the environment from toxic discharge.

CU 827360

GOTS

The Global Organic Textile Standard (GOTS) is the world's leading textile processing standard for organic fibers, including ecological and social criteria, backed by independent certification of the entire textile supply chain.

ECO TEST

Eco test certification con-firms there are no residue of harmful chemicals, fillers and synthetic rubber in the latex foam, this certification assures an ecocertified latex foam is toxic free and healthy to use in bedding.

OEKO TEX

Tested for harmful substances including illegal substances & legally regulated substances in textile raw materials. An independent testing and certification system for textile raw materials, intermediate and end products at all stages.

TUV TEST

This test evaluates the durability and the resilience It is essential to check the physical properties and hardness of the mattress core to ensure quality and assess life. The LGA certification is a mark of long-lasting durability with an intended purpose.

FSC™

FSC-labelled products come from a forest and supply chain that is managed responsibly. To achieve FSC certification, you must adhere to ten rules that cover the essentials of responsible forest management.
