

**Düsseldorf, Germany**

**THE WORLD'S  
NO. 1  
TRADE FAIR  
FOR  
PLASTICS  
AND  
RUBBER**

### Overview

K-Plastics & Rubber Exhibition, the special show illustrates how plastics shape everyday life, accompany us almost wherever we go and are capable of solving the problems of tomorrow. Numerous themes are spotlighted in discussions and multimedia presentations. The forum for research and teaching at K. Theory meets practice: institutes, universities, and other higher education establishments are presenting their latest research findings on the complex overall theme of plastics and rubber. Open to dialogue with you. Present your latest technologies and highlights. Make use of the global communication potential of the Innovation Compass. For trade visitors, it is the ideal medium for preparing effectively for their visit to the fair.
